

approve AMOCs for this AD. Send your proposal to: Robert Grant, Aviation Safety Engineer, Safety Management Group, FAA, 2601 Meacham Blvd., Fort Worth, Texas 76137; telephone (817) 222-5110; email robert.grant@faa.gov.

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, we suggest that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office, before operating any aircraft complying with this AD through an AMOC.

(g) Additional Information

(1) Agusta Bollettino Tecnico (BT) No. 109-137 for Model A109A, A109A II and A109C helicopters; BT No. 109EP-131 for Model A109E helicopters; BT No. 109K-59 for Model A109K2 helicopters; BT No. 109S-056 for Model A109S helicopters; BT No. 109SP-070 for Model AW109SP helicopters; and BT No. 119-062 for Model A119 and AW119 MKII helicopters, all Revision 0 and dated October 29, 2013, which are not incorporated by reference, contain additional information about the subject of this AD. For service information identified in this AD, contact AgustaWestland, Product Support Engineering, Via del Gregge, 100, 21015 Lonate Pozzolo (VA) Italy, ATTN: Maurizio D'Angelo; telephone 39-0331-664757; fax 39-0331-664680; or at <http://www.agustawestland.com/technical-bullettins>. You may review a copy of the service information at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth Texas 76137.

(2) The subject of this AD is addressed in European Aviation Safety Agency (EASA) Emergency AD No. 2013-0265-E, dated October 30, 2013. You may view the EASA AD on the internet at <http://www.regulations.gov> in Docket No. FAA-2014-0336.

(h) Subject

Joint Aircraft Service Component (JASC) Code: 6200 Main Rotor System.

Issued in Fort Worth, Texas, on May 21, 2014.

Lance T. Gant,

Acting Directorate Manager, Rotorcraft Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 878

[Docket No. FDA-2014-N-0576]

Medical Devices; General and Plastic Surgery Devices; Classification of the Powered Surgical Instrument for Improvement in the Appearance of Cellulite

AGENCY: Food and Drug Administration, HHS.

ACTION: Final order.

SUMMARY: The Food and Drug Administration (FDA) is classifying the powered surgical instrument for improvement in the appearance of cellulite into class II (special controls). The Agency is classifying the device into class II (special controls) in order to provide a reasonable assurance of safety and effectiveness of the device.

DATES: This order is effective July 3, 2014. The classification was applicable on July 12, 2013.

FOR FURTHER INFORMATION CONTACT: Jitendra Virani, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. G459, Silver Spring, MD 20993-0002, 301-796-6398.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 513(f)(1) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 360c(f)(1)), devices that were not in commercial distribution before May 28, 1976 (the date of enactment of the Medical Device Amendments of 1976), generally referred to as postamendments devices, are classified automatically by statute into class III without any FDA rulemaking process. These devices remain in class III and require premarket approval, unless and until the device is classified or reclassified into class I or II, or FDA issues an order finding the device to be substantially equivalent, in accordance with section 513(i) of the FD&C Act, to a predicate device that does not require premarket approval. The Agency determines whether new devices are substantially equivalent to predicate devices by means of premarket notification procedures in section 510(k) of the FD&C Act (21 U.S.C. 360(k)) and part 807 (21 CFR part 807) of the regulations.

Section 513(f)(2) of the FD&C Act, as amended by section 607 of the Food and Drug Administration Safety and

Innovation Act (Pub. L. 112-144, July 9, 2012, 126 Stat. 1054), provides two procedures by which a person may request FDA to classify a device under the criteria set forth in section 513(a)(1) (a de novo request). Under the first procedure, the person submits a premarket notification under section 510(k) of the FD&C Act for a device that has not previously been classified and, within 30 days of receiving an order classifying the device into class III under section 513(f)(1) of the FD&C Act, the person requests a classification under section 513(f)(2). Under the second procedure, rather than first submitting a premarket notification under section 510(k) and then a request for classification under the first procedure, the person determines that there is no legally marketed device upon which to base a determination of substantial equivalence and requests a classification under section 513(f)(2) of the FD&C Act. If the person submits a request to classify the device under this second procedure, FDA may decline to undertake the classification request if FDA identifies a legally marketed device that could provide a reasonable basis for review of substantial equivalence with the device or if FDA determines that the device submitted is not of "low-moderate risk" or that general controls would be inadequate to control the risks and special controls to mitigate the risks cannot be developed.

In response to a request to classify a device under either procedure provided by section 513(f)(2) of the FD&C Act, FDA will classify the device by written order within 120 days. This classification will be the initial classification of the device. In accordance with section 513(f)(1) of the FD&C Act, FDA issued an order on March 14, 2011, classifying the Cabochon System into class III, because it was not substantially equivalent to a device that was introduced or delivered for introduction into interstate commerce for commercial distribution before May 28, 1976, or a device which was subsequently reclassified into class I or class II. On October 29, 2011, Cabochon Aesthetics, Inc., submitted a request for classification of the Cabochon System under section 513(f)(2) of the FD&C Act. The manufacturer recommended that the device be classified into class II (Ref. 1).

In accordance with section 513(f)(2) of the FD&C Act, FDA reviewed the request in order to classify the device under the criteria for classification set forth in section 513(a)(1) of the FD&C Act. FDA classifies devices into class II if general controls by themselves are insufficient to provide reasonable

assurance of safety and effectiveness, but there is sufficient information to establish special controls to provide reasonable assurance of the safety and effectiveness of the device for its intended use. After review of the information submitted in the de novo request, FDA determined that the device can be classified into class II with the establishment of special controls. FDA believes these special controls, in addition to general controls, will provide reasonable assurance of the safety and effectiveness of the device.

Therefore, on July 12, 2013, FDA issued an order to the requestor classifying the device into class II. FDA is codifying the classification of the device by adding § 878.4790.

Following the effective date of this final classification administrative order, any firm submitting a premarket notification (510(k)) for a powered surgical instrument for improvement in the appearance of cellulite will need to comply with the special controls named in the final administrative order.

The device is assigned the generic name powered surgical instrument for

improvement in the appearance of cellulite, and it is identified as a prescription device that is used for the controlled release of subcutaneous tissue for improvement in the appearance of cellulite. The device consists of a cutting tool powered by a motor and a means for instrument guidance to control the areas of subcutaneous tissue cutting underneath the cellulite depressions or dimples.

FDA has identified the following risks to health associated with this type of device and the measures required to mitigate these risks:

TABLE 1—POWERED SURGICAL INSTRUMENT FOR IMPROVEMENT IN THE APPEARANCE OF CELLULITE RISKS AND MITIGATION MEASURES

Identified risks	Mitigation measures
Mechanical Injury (excessive treatment or treatment of non-intended areas).	Non-clinical Testing.
Infection	In Vivo Evaluation.
	Sterility Assurance Testing.
	Shelf-life Testing.
Electrical Shock	Electrical Safety Testing.
Electromagnetic Interference	Electromagnetic Compatibility (EMC) Testing.
Adverse Tissue Reaction	Biocompatibility Testing.
Use Error	In Vivo Evaluation.
	Labeling.

FDA believes that the following special controls, in addition to the general controls, address these risks to health and provide reasonable assurance of safety and effectiveness:

(1) Non-clinical testing must be performed to demonstrate that the device meets all design specifications and performance requirements, and to demonstrate durability and mechanical integrity of the device.

(2) In vivo evaluation of the device must demonstrate device performance, including the safety of the release methodology and blood loss at the treatment sites.

(3) All elements of the device that may contact the patient must be demonstrated to be biocompatible.

(4) Electrical safety and electromagnetic compatibility of the device must be demonstrated.

(5) The labeling must include a summary of in vivo evaluation data and all the device specific warnings, precautions, and/or contraindications.

(6) Sterility and shelf-life testing for the device must demonstrate the sterility of patient contacting components and the shelf life of these components.

Powered surgical instruments for improvement in the appearance of cellulite are prescription devices restricted to patient use only upon the authorization of a practitioner licensed by law to administer or use the device. (Proposed § 878.4790(a) (21 CFR

878.4790(a)); see section 520(e) of the FD&C Act (21 U.S.C. 360j(e)) and § 801.109 (21 CFR 801.109) (*Prescription devices*.) Prescription use restrictions are a type of general controls as defined in section 513(a)(1)(A)(i) of the FD&C Act.

Section 510(m) of the FD&C Act provides that FDA may exempt a class II device from the premarket notification requirements under section 510(k) of the FD&C Act if FDA determines that premarket notification is not necessary to provide reasonable assurance of the safety and effectiveness of the device. Therefore, this device type is not exempt from premarket notification requirements. Persons who intend to market this type of device must submit to FDA a premarket notification prior to marketing the device, which contains information about the powered surgical instrument for improvement in the appearance of cellulite they intend to market.

II. Environmental Impact

The Agency has determined under 21 CFR 25.34(b) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment

nor an environmental impact statement is required.

III. Paperwork Reduction Act of 1995

This final administrative order establishes special controls that refer to previously approved collections of information found in other FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in part 807, subpart E, regarding premarket notification submissions have been approved under OMB control number 0910–0120, and the collections of information in 21 CFR part 801, regarding labeling, have been approved under OMB control number 0910–0485.

IV. Reference

The following reference has been placed on display in the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday, and is available electronically at <http://www.regulations.gov>.

1. K101231: De Novo Request per 513(f)(2) pursuant to the Agency's NSE Determination, dated March 14, 2011, from Cabochon Aesthetics, Inc., dated October 29, 2011.

List of Subjects in 21 CFR Part 878

Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 878 is amended as follows:

PART 878—GENERAL AND PLASTIC SURGERY DEVICES

■ 1. The authority citation for 21 CFR part 878 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 360l, 371.

■ 2. Add § 878.4790 to subpart E to read as follows:

§ 878.4790 Powered surgical instrument for improvement in the appearance of cellulite.

(a) *Identification.* A powered surgical instrument for improvement in the appearance of cellulite is a prescription device that is used for the controlled release of subcutaneous tissue for improvement in the appearance of cellulite. The device consists of a cutting tool powered by a motor and a means for instrument guidance to control the areas of subcutaneous tissue cutting underneath the cellulite depressions or dimples.

(b) *Classification.* Class II (special controls). The special controls for this device are:

(1) Non-clinical testing must be performed to demonstrate that the device meets all design specifications and performance requirements, and to demonstrate durability and mechanical integrity of the device.

(2) In vivo evaluation of the device must demonstrate device performance, including the safety of the release methodology and blood loss at the treatment sites.

(3) All elements of the device that may contact the patient must be demonstrated to be biocompatible.

(4) Electrical safety and electromagnetic compatibility of the device must be demonstrated.

(5) The labeling must include a summary of in vivo evaluation data and all the device specific warnings, precautions, and/or contraindications.

(6) Sterility and shelf-life testing for the device must demonstrate the sterility of patient contacting components and the shelf life of these components.

Dated: May 23, 2014.

Leslie Kux,

Assistant Commissioner for Policy.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT**24 CFR Part 3280**

[Docket No. FR-5787-F-01]

RIN 2502-AJ21

Manufactured Housing Constructions and Safety Standards: Correction of Reference Standard for Anti-Scald Valves

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This final rule amends the Federal Manufactured Home Construction and Safety Standards by incorporating the correct reference standard for anti-scald devices designed for bathtubs and whirlpool tubs without showers, ASSE 1070-2004, Performance Requirements for Water Temperature Limiting Devices. Anti-scald valves mitigate the danger of serious burns and other hazards caused by bursts of hot water resulting from sudden changes in water pressure. In a final rule published on December 9, 2013, HUD incorporated ASSE 1016-2005, an anti-scalding device designed for showers and tub-shower combinations. HUD failed to incorporate, however, ASSE 1070-2004, which is designed for fixtures such as bathtubs and whirlpool tubs that do not have showers. To correct this and ensure the safety of occupants of manufactured homes with bathtubs and whirlpool tubs without showers, this final rule incorporates ASSE 1070-2004.

DATES: *Effective Date:* July 3, 2014. The incorporation by reference of certain publications listed in the rule is approved by the Director of the Federal Register as of July 3, 2014.

FOR FURTHER INFORMATION CONTACT: Pamela Beck Danner, Administrator, Office of Manufactured Housing Programs, Room 9168, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410; telephone number 202-708-6423 (this is not a toll-number). Persons with hearing or speech impairments may access this number via TTY by calling the Federal Relay Service at 1-800-877-8389 (this is a toll-free number).

SUPPLEMENTARY INFORMATION:**I. Background**

The National Manufactured Housing Construction and Safety Standards Act of 1974 (42 U.S.C. 5401-5426) (the Act) authorizes HUD to establish and amend the Federal Manufactured Home Construction and Safety Standards

codified in 24 CFR part 3280. The Act was amended in 2000 by the Manufactured Housing Improvement Act of 2000 (Pub. L. 106-569), by expanding its purposes and creating the Manufactured Housing Consensus Committee (MHCC).

As amended, the purposes of the Act (enumerated at 42 U.S.C. 5401) are: “(1) To protect the quality, durability, safety, and affordability of manufactured homes; (2) to facilitate the availability of affordable manufactured homes and to increase homeownership for all Americans; (3) to provide for the establishment of practical, uniform, and, to the extent possible, performance-based Federal construction standards for manufactured homes; (4) to encourage innovative and cost-effective construction techniques for manufactured homes; (5) to protect residents of manufactured homes with respect to personal injuries and the amount of insurance costs and property damages in manufactured housing consistent with the other purposes of this section; (6) to establish a balanced consensus process for the development, revision, and interpretation of Federal construction and safety standards for manufactured homes and related regulations for the enforcement of such standards; (7) to ensure uniform and effective enforcement of Federal construction and safety standards for manufactured homes; and (8) to ensure that the public interest in, and need for, affordable manufactured housing is duly considered in all determinations relating to the Federal standards and their enforcement.”

II. This Final Rule

On December 9, 2013, at 78 FR 73966, HUD published a final rule that amended the Federal Manufactured Home Construction and Safety Standards at 24 CFR part 3280 by adopting certain recommendations made to HUD by the MHCC, as modified by HUD. Among other changes, HUD's December 9, 2013, final rule revised the Manufactured Home Construction and Safety Standards by updating the incorporated reference standards that establish the standards for the various components of a manufactured home. Most of HUD's changes codified existing building practices or conformed HUD standards to HUD interpretive bulletins or existing building codes.

One update codified by HUD's December 9, 2013, final rule was to require that shower, bath, and tub-shower combination valves be either balanced pressure, thermostatic, or a combination of mixing valves that conforms to the requirements of ASSE
