Protection of Stratospheric Ozone: Notice of Data Availability; New Information Concerning SNAP Program Proposal on HCFC Use in Foams

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of data availability and request for comment.

SUMMARY: The Environmental Protection Agency (EPA) is making available to the public information related to a July 11, 2000, proposal under the Significant New Alternatives Policy (SNAP) Program under section 612 of the Clean Air Act. The SNAP program reviews alternatives to Class I and Class II ozone depleting substances and approves use of alternatives which reduce the overall risk to public health and the environment. The July 11, 2000 proposal concerned use of hydrochlorofluorocarbons (HCFCs) in foam blowing applications. The official comment period for the proposal ended on September 11, 2000. However, EPA received information after September 11, 2000 from outside parties through letters, meetings and the Agency's own efforts to obtain information to address public comments. Today, the Agency is making new information obtained after the close of the comment period available for public review and comment. The information being made available includes: sector description and size, alternatives currently used in each sector and technically viable alternatives. Because we plan to use this information in the future when developing a final rule, EPA wants to provide the public with an opportunity to comment on it.
