Form Number(s): None.

Type of Request: Regular submission.

Number of Respondents: 300,000.

Average Hours per Response: 15 minutes.

Burden Hours: 75,000.

Needs and Uses: The Survey of International Air Travelers (SIAT) program, administered by the National Travel and Tourism Office (NTTO) of the International Trade Administration provides source data required to: (1) Estimate international travel and passenger fare exports, imports, and the trade balance for the United States, (2) comply with the U.S. Travel Promotion Act of 2009 (Pub. L. 111-145), collect, analyze, and report information to the Corporation for Travel Promotion (CTP), and support U.S. exports, (3) comply with the 1945, 1961, 1981, and 1996 travel and tourism related acts to collect and publish comprehensive international travel and tourism statistics and other marketing information, and (4) support the continuation of the Travel & Tourism Satellite Accounts for the United States, which provide the only spending and employment figures for the industry. The SIAT program contains the core data that is analyzed and communicated by NTTO with other government

agencies, associations and businesses that share the same objective of increasing U.S. international travel exports. The SIAT assists NTTO in assessing the economic impact of international travel on state and local economies, providing visitation estimates, key market intelligence, and identifying traveler and trip characteristics. The U.S. Department of Commerce assists travel industry enterprises to increase international travel and passenger fare exports for the country as well as outbound travel on U.S. carriers. The Survey program provides the only available estimates of nonresident visitation to the states and cities within the United States, as well as U.S. resident travel abroad.

The SIAT also assists NTTO in producing in-depth statistical reports, fact sheets and briefings on economic factors and policy issues affecting U.S. industries. With the SIAT statistical data not replicable by private sector trade associations or by private firms, Federal agencies, Congress and international organizations rely on these statistic-based tools, as do American businesses, state and local governments, and news organizations.
