

provisions, including annual reporting requirements on FCC Form 655. For other service providers that are not Tier I carriers, the expanded scope of the Commission's hearing aid compatibility provisions applies beginning April 1, 2018.

Following release of the Fourth Report and Order, the Commission is required to amend the FCC Form 655 to reflect the newly expanded scope of handsets covered by the hearing aid compatibility provisions, as well as to capture information regarding existing disclosure requirements clarified by the Commission in the Fourth Report and Order. As a consequence of the Fourth Report and Order, FCC Form 655 filing and other requirements will apply to those newly-covered handsets offered by device manufacturers and service providers that have already been reporting annually on their compliance with the Commission's hearing aid compatibility provisions, as well to any device manufacturers and service providers that were previously exempt because they did not offer any covered handsets or services prior to 2018.

As a result, the Commission is requesting a revision of this collection in order to implement the final rules promulgated in the Fourth Report and Order, which expanded the scope of the rules due to a shift from Commercial Mobile Radio Services (CMRS) to digital mobile service. We estimate that the expanded scope will increase the potential number of respondents subject to this collection and correspondingly increase the responses and burden hours. The minor language changes to the instructions to FCC Form 655 and to the form itself clarifying this expanded scope will help the Commission compile data and monitor compliance with the current version of the hearing aid compatibility rules while making more complete and accessible information available to consumers.

(b) Additionally, the manufacturer or supplier must also include a DoC (with the standards) in the literature furnished with the equipment, and the equipment manufacturer or supplier must also make this statement of conformity and supporting technical data available to the FCC, at the Commission's request.

(c) The DoC procedure represents a simplified filing and reporting procedure for authorizing equipment for marketing.

(d) Finally, testing and documentation of compliance are needed to control potential interference to radio communications. The data gathering are necessary for investigating complaints of harmful interference or for verifying the manufacturer's compliance with the Commission's rules.
