

Type of Request: Extension of an information collection previously approved by the Office of Management and Budget.

Abstract: To be considered for employment with the Corps, each youth must complete FS-1800-3, Youth Conservation Corps Medical History Form. Applicants are asked to answer questions regarding their personal health. The purpose of FS-1800-3 is to certify the youth's physical fitness to work in the seasonal employment Program. The applicant's parents or guardian must sign the form.

Data gathered in this information collection are not available from other sources.

Estimate of Annual Burden: 14 minutes.

Type of Respondents: Youth 15 to 18 years old.

Estimated Annual Number of Respondents: 18,000.

Estimated Annual Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 4,200 hours.

Comment Is Invited

The agency invites comments on the following: (a) Whether the proposed collection of information is necessary for the stated purpose and the proper performance of the functions of the agency, including whether the information will have practical or scientific utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Use of Comments

All comments received in response to this notice, including names and address when provided, will become a matter of public record. Comments will be summarized and included in the request for Office of Management and Budget.

Dated: June 11, 2003.

Irving W. Thomas,

Acting Deputy Chief Operations.

BILLING CODE 3410-11-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 061203F]

Submission for OMB Review; Comment Request

The Department of Commerce has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: National Marine Sanctuaries - Socioeconomic Impacts of Marine Reserves.

Form Number(s): None.

OMB Approval Number: 0648-0408.

Type of Request: Regular submission.

Burden Hours: 1,330.

Number of Respondents: 665.

Average Hours Per Response: 2.

Needs and Uses: NOAA's National Marine Sanctuaries are authorized under the National Marine Sanctuary Act to use zoning to prohibit or restrict uses in certain portions (zones) of sanctuaries. Ecological Reserves, Sanctuary Preservation Areas, or Marine Reserves (no-take zones) are being proposed. There is a need to evaluate the socioeconomic impact that no-take zones might have on different user groups. Those activities that might be displaced from no-take zones include commercial fishing operations, recreational fishing operations, and individuals takes of anything in the area. The surveys will collect socioeconomic data for use by NOAA, sanctuary advisory councils, and similar participants in the planning process.

Affected Public: Business or other for-profit organizations, individuals or households, and not-for-profit institutions.

Frequency: Annually, one-time.

Respondent's Obligation: Voluntary.

OMB Desk Officer: David Rostker, (202) 395-3897.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, Room 6625, 14th and Constitution Avenue, NW, Washington, DC 20230 (or via the Internet at dHynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to David Rostker, OMB Desk

Officer, Room 10202, New Executive Office Building, Washington, DC 20503.

Dated: June 11, 2003.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

Submission for OMB Review; Comment Request

The Department of Commerce has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Northeast Region Vessel Monitoring and Communications.

Form Number(s): None.

OMB Approval Number: 0648-0404.

Type of Request: Regular submission.

Burden Hours: 974.

Number of Respondents: 150.

Average Hours Per Response: 1 hour for installation of a vessel monitoring system (VMS); 2 minutes for verification of installation; 5 seconds for an automatic position report; and 2 minutes for a Letter of Authorization Exemption request.

Needs and Uses: Owners or operators of vessels that have caught 500 metric tons of herring in the past year, or intend to catch 500 metric tons in the current year, must equip their vessels with an approved Vessel Monitoring System (VMS). The VMS units automatically report the vessel's position at least once per hour when the vessel is underway. Vessel owners must submit proof that the VMS has been installed. Herring carriers may be exempted from this requirement by obtaining a letter of authorization from NOAA.

Affected Public: Business or other for-profit organizations, individuals or households.

Frequency: On occasion, hourly.

Respondent's Obligation: Mandatory.

OMB Desk Officer: David Rostker, (202) 395-3897.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance

Officer, (202) 482-0266, Department of Commerce, Room 6625, 14th and Constitution Avenue, NW, Washington, DC 20230 (or via the Internet at dHynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to David Rostker, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, DC 20503.

BILLING CODE 3510-22-S

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 060603E]

Intent to Analyze the Effects of the Subsistence Taking of Northern Fur Seals on the Pribilof Islands, Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of intent; scoping meetings; request for comments.

SUMMARY: NMFS intends to prepare an Environmental Impact Statement (EIS) regarding possible changes to the subsistence harvest of the Pribilof Islands stock of northern fur seals. The scope of the EIS will consist of a broad review of the subsistence harvest management on the Pribilof Islands including the manner in which the harvest is conducted. NMFS intends to hold scoping meetings to receive public input on the issues of concern and the appropriate range of management alternatives to be addressed in the EIS. In addition to holding the scoping meetings, NMFS solicits written comments related to the scope of the analysis.

DATES: Written comments will be accepted through September 16, 2003.

ADDRESSES: Written comments should be addressed to the Assistant Regional Administrator, Protected Resources Division, NMFS, P.O. Box 21668, Juneau, AK 99802, Attn: Lori Durall. Requests to be included on a mailing list of persons interested in the EIS should be sent to Mr. David Cormany at 222 West 7th Avenue, Box 43, Anchorage, AK 99513. Comments may also be hand-delivered to NMFS, Federal Building,

709 West 9th Street, Juneau, AK, or NMFS, Federal Building, Room 517, 222 West 7th Avenue, Anchorage, AK. NMFS is not accepting email or internet comments.

FOR FURTHER INFORMATION CONTACT:

David Cormany, (907) 271-5006.

SUPPLEMENTARY INFORMATION: On July 9, 1985 (50 FR 27914), NMFS published an emergency interim rule to govern the subsistence taking of fur seals by Alaska Native (Aleut) residents of the Pribilof Islands. A final rule was subsequently published on July 9, 1986 (51 FR 24828). The subsistence harvest of northern fur seals on the Pribilof Islands is governed by regulations at 50 CFR 216 Subpart F—Pribilof Islands, Taking for Subsistence Purposes. These regulations were published under the authority of the Fur Seal Act (FSA), 16 U.S.C. 1151 *et seq.*, and the Marine Mammal Protection Act (MMPA), 16 U.S.C. 1361 *et seq.* The purpose of these regulations was to provide for the subsistence needs of the Pribilof Aleuts using humane harvesting methods and to restrict taking by sex, age, and season for herd management purposes.

The Need for an EIS on this Action

An Environmental Assessment and a Finding of No Significant Impact of the harvest on the fur seal population have been considered adequate to address the Agency's NEPA compliance responsibilities in the past. However, evidence is building that continued management under the harvest regulations in combination with other past, present, and future actions, may be having a significant impact on the human environment. Therefore, preparation of an EIS for the proposed action may be required by NEPA and implementing regulations at 40 CFR 1501.4.

NMFS is required to publish a Notice of Intent (NOI) to, among other things, describe the proposed scoping process, including any scoping meetings to be held. The NOI also serves as the official notice that a Federal agency is commencing preparation of an EIS pursuant.

NMFS will examine all activities addressing the conduct of the subsistence harvest management. The cumulative effects section of the EIS will address the incremental cumulative effects of these management alternatives on northern fur seals when added to the effects of past, other present, or reasonably foreseeable future actions including the significant effects finding of the Steller Sea Lion Protection Measures EIS (NMFS 2001). The EIS for Steller sea lions examined the effects of

management measures implemented in the groundfish fisheries in the Bering Sea and Aleutian Islands (BSAI) to protect endangered Steller sea lions in the area. In the analyses of the cumulative effects of the action on the environment, it was determined that commercial fishing and environmental changes (effects of a regime shift) may result in a conditionally significant adverse effect on northern fur seals. Therefore, while the subsistence harvest is not likely to have any direct or indirect effects on the fur seal population that would be considered significant under NEPA, the cumulative effects of the subsistence harvest alternatives when added to the effects of the groundfish fisheries on the harvest alternatives may result in a similar cumulative effects finding as identified in NMFS (2001).

Information and Comments Solicited

NMFS solicits comments and information to identify the complete range of alternatives to be analyzed. Alternatives analyzed in this EIS may include those identified below, plus additional alternatives identified through the public scoping process and through working with the Tribal Governments and other constituent groups. Potential alternatives that have already been identified include the following: (1) status quo alternative- No action will be taken to change existing regulations at 50 CFR 216 subpart F. The conduct and management of the harvest will remain as it has been; (2) an alternative that combines some of the existing regulations with agreed upon stipulations identified in the co-management agreements between NMFS and the Tribal Governments pursuant to section 119 of the MMPA; and (3) a harvest regime that is completely managed through co-management pursuant to section 119 of the MMPA.

NMFS has entered into co-management agreements with the Tribal Governments of St. Paul Island and St. George Island under section 119 of the MMPA in 2000 and 2001, respectively. These agreements are specific to the conservation and management of northern fur seals and Steller sea lions on the Pribilof Islands, with particular attention to the subsistence take and use of these animals. NMFS has worked with both communities to integrate the agreements into one management plan for the purpose of recovering and maintaining the fur seal population. Under this alternative all current regulations would be eliminated.

NMFS is also seeking information on the environmental, social and economic issues to be considered in the analysis.
