Synopsis

On December 21, 2007, Hawk Relay, LLC (Hawk Relay) filed a request for clarification that Internet Protocol Speech-to-Speech Relay Service (IP STS) is a form of Telecommunications Relay Service (TRS) eligible for compensation from the Interstate TRS Fund. See Hawk Relay, *Request for Expedited Clarification for the Provision and Cost Recovery of Internet Protocol Speech to Speech Relay Service*, CG Docket No. 03–123, filed December 21, 2007 (*Request*). In its *Request*, Hawk Relay describes IP STS as a type of Speech-to-Speech service (STS) that uses the Internet, rather than a traditional telephone line, to connect the consumer to the relay provider. STS enables persons with a speech disability to make telephone calls using their own voice through relay centers with specially trained communications assistants who re-voice to the calling party what the STS user says.

The Bureau hereby seeks comment on the *Request*. In addition, assuming that IP STS qualifies as a TRS under section 225(a)(3) of the Communications Act of 1934, the Bureau seeks comment on the jurisdictional separation of costs, the applicability of the TRS mandatory minimum standards, and on any other issues relevant to the provision of IP STS.

Federal Communications Commission.

Nicole McGinnis,

Deputy Chief, Consumer & Governmental Affairs Bureau.
