

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. All minerals, together with the right to prospect for, mine, and remove such deposits from the lands under applicable law and such regulations as the Secretary of the Interior may prescribe.

3. All valid existing rights, e.g. rights-of-way and leases of record.

Provisions that if the patentee or its successor attempts to transfer title to or control over the land to another or the land is devoted to a use other than that for which the land was conveyed, without the consent of the Secretary of the Interior or his delegate, or prohibits or restricts, directly or indirectly, or permits it agents, employees, contractors, or subcontractors, including without limitation, lessees, sublessees and permittees, to prohibit or restrict, directly or indirectly, the use of any part of the patented lands or any of the facilities whereon by any person because of such person's race, creed, sex, color, or national origin, title shall revert to the United States.

The lands are not needed for Federal purposes. Leasing and later patenting is consistent with current Bureau of Land Management policies and land use planning. The proposal serves the public interest since it would provide the recreation facilities and related buildings that would meet the needs of the school system and the surrounding population.

Upon publication of this notice in the **Federal Register**, the above described public lands will be segregated from all other forms of appropriation under the public land laws, including the general mining laws, except for patent under the R&PP Act and leasing under the mineral leasing laws.

Classification Comments: Interested parties may submit comments involving the suitability of the land for conveyance. Comments on the classification are restricted to whether the land is physically suited for the proposal, whether the use will maximize the future uses of the land, whether the use is consistent with local planning and zoning, or if the use is consistent with state and Federal programs.

Patent Comments: Interested parties may submit comments regarding the patent and the specific use proposed in the application and plan of development, whether the BLM followed proper administrative procedures in reaching the decision, or any other factor not directly related to the suitability of the land for R&PP use.

Confidentiality of Comments: Before including your address, phone number, e-mail address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Any adverse comments will be reviewed by the Dillon Field Manager, who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, the classification of the land described in this notice will become effective on October 22, 2007. The land will not be offered for patent until after the classification becomes effective.
