SUPPLEMENTARY INFORMATION:

Background

On December 21, 2000, the President signed the "Launching Our Communities' Access to Local Television Act of 2000," Pub. L. 106-553 (the "Act"). The Act provides for the establishment of the Local Television Loan Guarantee Board (the "Board"), which consists of the Secretaries of Agriculture, Treasury, Commerce, and the Chair of the Board of Governors of the Federal Reserve System, or their designees. The Board may approve loan guarantees up to 80% of not in excess of \$1.25 billion of loans, to facilitate access, on a technologically neutral basis, to signals of local television stations for households located in nonserved areas and underserved areas. The Act provides that, among other matters, the Administrator of RUS shall prescribe regulations to implement the Act and shall issue and otherwise administer loan guarantees approved by the Board. Congress has not yet provided appropriations for these guarantees, but may do so in the near future. The Act contains several specialized technical and business provisions and may be found in its entirety on the RUS website (www.rurdev.usda.gov/rus).

In light of its statutory role in implementing and administering the Act's loan guarantee program, RUS is currently analyzing the provisions of the Act, identifying issues potentially affecting the implementation of the program, and considering how the program can be effectively implemented. RUS is interested in receiving information regarding all aspects, including any financial and technological implications, of the program as well as analyses of any provisions of the Act that may present issues or practical problems in implementing the program. RUS invites interested parties including, but not limited to, financial and lending institutions, equipment providers, facility and other TV broadcast providers, cable and satellite providers, trade associations, consumer groups,
