

administrative in nature, does not involve any change in the types or significant increase in the amounts of effluents that may be released offsite, and does not contribute to any significant increase in occupational or public radiation exposure. Accordingly, there is no significant change in the types or significant increase in the amounts of any effluents that may be released offsite, and no significant increase in individual or cumulative public or occupational radiation exposure. Therefore, the requirements of 10 CFR 51.22(c)(25)(ii) and (iii) are met.

Requirements in 10 CFR 51.22(c)(25)(iv)

The exempted regulation is not associated with construction, and the exemption does not propose any changes to the site, alter the site, or change the operation of the site. Therefore, the requirements of 10 CFR 51.22(c)(25)(iv) are met because there is no significant construction impact.

Requirements in 10 CFR 51.22(c)(25)(v)

The exemption involves administrative filing requirements. The exemption would allow the information required for the first part of the CP application under 10 CFR 2.101(a)(5) to be deferred to the second part of the submittal. As such, the exemption does not impact the probability or consequences of accidents. Thus, there is no significant increase in the potential for, or consequences of, a radiological accident. Therefore, the requirements of 10 CFR 51.22(c)(25)(v) are met.

Requirements in 10 CFR 51.22(c)(25)(vi)

To qualify for a categorical exclusion under 10 CFR 51.22(c)(25)(vi), the exemption must be from certain requirements only. Subsection (c)(25)(vi)(G) allows scheduling requirements to be subject to a categorical exclusion. The exemption involves scheduling requirements because it involves administrative filing requirements. The exemption would allow the information required for the first part of the CP application under 10 CFR 2.101(a)(5) to be deferred to the second part of the submittal. Therefore, the requirements of 10 CFR 51.22(c)(25)(vi) are met.

Based on the above, the NRC concludes that the proposed exemption meets the eligibility criteria for a categorical exclusion set forth in 10 CFR 51.22(c)(25). Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the granting of this exemption request.

IV. Conclusion

Accordingly, the NRC has determined that, pursuant to 10 CFR 50.12, this exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also, special circumstances, as defined in 10 CFR 50.12(a)(2), are present. Therefore, the NRC hereby grants the applicant a one-time exemption from the specific requirement of 10 CFR 2.101(a)(5) to file a portion of the PSAR as part of the first submittal in the two-part application submittal process. The decision to issue TVA this exemption does not constitute approval of the CP application TVA intends to submit. The NRC staff will determine if the application is sufficient for docketing and the application would be reviewed using established NRC license review processes and standards. The complete application must meet all applicable regulatory requirements before a CP is issued by NRC.

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 21st day of November 2023.
