

UNESCO

UNESCO action in education strategy is shaped by three objectives which include promoting education as a fundamental human right; improving the quality of education for all children; and promoting experimentation, innovation and the diffusion and sharing of information and best practices as well as policy dialogue in education. The Government of Pakistan has responded favorably to UNESCO's Education For All commitment. Current UNESCO projects in Pakistan focus on street and working children as well as children working in the carpet industry in Lahore. UNESCO has also undertaken a teacher-training program that incorporates using the resources and infrastructure of national and regional teacher training colleges and has also been involved in the development and improvement of student assessment tools.

UNICEF

UNICEF operates in over 161 countries, areas and territories on solutions to problems facing children and their families and on ways to realize their rights. Work is carried out in partnership with governments, civil society organizations and communities to offer children the best possible start in life. Programs focus on policies, legislation and programmatic support to protect children in vulnerable situations. Their work reaches out to those who have been traditionally forgotten, including child laborers. In the last three years, UNICEF has worked with the Department of Education, Government of the Punjab to implement the Universal Primary Education Project. This project has worked in several districts and has fully involved communities and teachers in combating child labor and increasing enrollment. The project's major objectives have been: (1) To enroll every child in the age group of five to seven years and retain them for the entire primary cycle; (2) to provide quality education, and (3) to bring attitudinal change among communities to make them supportive of UPE. In Pakistan, UNICEF is interested in vocational skills training for older youth involved in work.

BILLING CODE 4510–28–P

DEPARTMENT OF LABOR**Occupational Safety and Health Administration**

[Docket No. NRTL1–88]

MET Laboratories, Inc., Renewal and Expansion of Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: This notice announces the Agency's final decision on the application of MET Laboratories, Inc., for renewal of its recognition as a Nationally Recognized Testing Laboratory, under 29 CFR 1910.7, and the related application of MET Laboratories, Inc., for expansion of its recognition to include additional test standards.

EFFECTIVE DATE: The renewal is effective on May 23, 2002 and will be valid until May 23, 2007, unless terminated or modified prior to that date, in accordance with 29 CFR 1910.7. The renewal incorporates the expansion.

FOR FURTHER INFORMATION CONTACT: Bernard Pasquet or Sherrey Nicolas, Office of Technical Programs and Coordination Activities, NRTL Program, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N3653, Washington, DC 20210, or phone (202) 693–2110.

SUPPLEMENTARY INFORMATION:**Notice of Final Decision**

The Occupational Safety and Health Administration (OSHA) hereby gives notice of the renewal and expansion of recognition of MET Laboratories, Inc., (MET) as a Nationally Recognized Testing Laboratory (NRTL). MET's expansion covers the use of two additional test standards. The NRTL's scope of recognition may be found in the following OSHA informational web page: <http://www.osha-slc.gov/dts/otpca/nrtl/met.html>. The information on this page will be updated in the very near future to include the recognitions granted in this notice.

OSHA recognition of an NRTL signifies that the organization has met the legal requirements in §1910.7 of Title 29, Code of Federal Regulations (29 CFR 1910.7). Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within its scope of recognition and is not a delegation or grant of government authority. As a result of recognition, employers may use

products "properly certified" by the NRTL to meet OSHA standards that require testing and certification.

The Agency processes applications by an NRTL for initial recognition or for expansion or renewal of this recognition following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the Agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides its preliminary finding and, in the second notice, the Agency provides its final decision on the application. These notices set forth the NRTL's scope of recognition or modifications of that scope. We maintain an informational web page for each NRTL, which details its scope of recognition. These pages can be accessed from our web site at <http://www.osha-slc.gov/dts/otpca/nrtl/index.html>.

MET Laboratories, formerly known as MET Electrical Testing Company, applied to OSHA for recognition as a Nationally Recognized Testing Laboratory in April 1988. On May 16, 1989 (54 FR 21136), it received this initial recognition. MET applied for its first renewal in August 1993, which OSHA announced, along with other MET applications on August 6, 1996 (61 FR 41661) and granted on November 20, 1996 (61 FR 59114). The Agency granted MET's renewal for a period of five years ending on November 20, 2001.

Appendix A to 29 CFR 1910.7 stipulates that the period of recognition of an NRTL is five years and that an NRTL may renew its recognition by applying not less than nine months, nor more than one year, before the expiration date of its current recognition. MET submitted a request, dated February 9, 2001 (see Exhibit 28), to renew its recognition within the time allotted, and MET retains its recognition pending OSHA's final decision in this renewal process. MET's existing scope of recognition consists of the facility already recognized and the supplemental programs, as listed below, and the test standards listed under *Renewal of Recognition* below.

MET also submitted a request, dated February 13, 2002 (see Exhibits 28–1), to expand its recognition to include the two additional test standards listed below. The OSHA NRTL Program staff determined that the two test standards, listed below under *Expansion of Recognition*, are appropriate within the meaning of 29 CFR 1910.7(c) and can be included in MET's scope of recognition. The staff makes such determinations in processing applications from any NRTL.

In processing MET's renewal request, OSHA NRTL Program staff performed an on-site review of MET's facility on October 1 and 3, 2001. In the on-site review report (see Exhibit 29), the staff recommended a "positive finding," which means a positive recommendation to the Assistant Secretary regarding the renewal. In processing MET's expansion request to include the additional standards, OSHA NRTL Program staff did not perform an on-site review but reviewed documentation pertinent to the request and in a memo (see Exhibit 29-1) recommended the expansion of MET's recognition to include the additional test standards listed below.

OSHA published the required notice in the **Federal Register** on April 11, 2002 (67 FR 17722), to announce MET's renewal and expansion requests. This notice included a preliminary finding that MET could meet the requirements in 29 CFR 1910.7 for renewal and expansion of its recognition and invited public comment by April 26, 2002. OSHA received no comments concerning this notice.

The previous notice published by OSHA for MET's recognition covered an expansion of recognition to include additional standards, which became effective on September 26, 2001 (66 FR 49211). The other **Federal Register** notices related to MET's recognition that OSHA has published since MET's previous renewal addressed an expansion for additional standards, which OSHA announced on November 10, 1998 (63 FR 63085) and granted on March 9, 1999 (64 FR 11502). The renewal incorporates all of these recognitions granted to MET, including the expansion being granted in this notice.

You may obtain or review copies of all public documents pertaining to the MET applications by contacting the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N2625, Washington, DC 20210. You should refer to Docket No. NRTL1-88, the permanent record of public information on the MET recognition.

The current address of the MET facility (site) already recognized by OSHA is: MET Laboratories, Inc., 914 West Patapsco Avenue, Baltimore, Maryland 21230.

Programs and Procedures

The renewal of recognition includes MET's continued use of the following supplemental programs and procedures based upon the criteria detailed in the March 9, 1995 **Federal Register** notice

(60 FR 12980, 3/9/95). This notice lists nine (9) programs and procedures (collectively, programs), eight of which an NRTL may use to control and audit, but not actually to generate, the data relied upon for product certification. An NRTL's initial recognition will always include the first or basic program, which requires that all product testing and evaluation be performed in-house by the NRTL that will certify the product. OSHA has already recognized MET for these programs. See <http://www.osha-slc.gov/dts/otpca/nrtl/met.html>.

Program 2: Acceptance of testing data from independent organizations, other than NRTLs.

Program 3: Acceptance of product evaluations from independent organizations, other than NRTLs.

Program 4: Acceptance of witnessed testing data.

Program 5: Acceptance of testing data from non-independent organizations.

Program 6: Acceptance of evaluation data from non-independent organizations (requiring NRTL review prior to marketing).

Program 7: Acceptance of continued certification following minor modifications by the client.

Program 8: Acceptance of product evaluations from organizations that function as part of the International Electrotechnical Commission Certification Body (IEC-CB) Scheme.

Program 9: Acceptance of services other than testing or evaluation performed by subcontractors or agents.

OSHA developed these programs to limit how an NRTL may perform certain aspects of its work and to permit the activities covered under a program only when the NRTL meets certain criteria. In this sense, they are special conditions that the Agency places on an NRTL's recognition. OSHA does not consider these programs in determining whether an NRTL meets the requirements for recognition under 29 CFR 1910.7. However, these programs help to define the scope of that recognition.

Final Decision and Order

The NRTL Program staff has examined the applications, the assessor's report and memo, and other pertinent information. Based upon this examination and the assessor's recommendations, OSHA finds that MET Laboratories, Inc., has met the requirements of 29 CFR 1910.7 for renewal and expansion of its NRTL recognition. The renewal and expansion apply to the site listed above. In addition, the renewal and expansion cover the test standards listed below and are subject to the limitations and

conditions, also listed below. Pursuant to the authority in 29 CFR 1910.7, OSHA hereby renews and expands the recognition of MET, subject to these limitations and conditions.

Limitations

Renewal of Recognition

OSHA limits the renewal of recognition of MET to the site listed above. OSHA further limits the renewal of recognition of MET to testing and certification of products for demonstration of conformance to the following 102 test standards, which OSHA has previously recognized for MET. Except as explained below (see paragraph immediately following listing of standards), all these standards are "appropriate," within the meaning of 29 CFR 1910.7(c).

ANSI C12.1 Code for Electricity Meters
ANSI/IEEE C57.13 Terminology and Test Code for Instrument Transformers
ANSI/UL 5 Surface Metal Raceways and Fittings

 ANSI/UL 1571 Incandescent Lighting Fixtures
 UL 1598 Luminaries
 ANSI/UL 1573 Stage and Studio Lighting Units
 UL 1585 Class 2 and Class 3 Transformers
 UL 1604 Electrical Equipment for Use In Class I and II, Division 2, and Class III Hazardous (Classified) Locations
 ANSI/UL 1638 Visual Signaling Appliances—Private Mode Emergency and General Utility Signaling
 ANSI/UL 1647 Motor-Operated Massage and Exercise Machines
 UL 1778 Uninterruptible Power Supply Equipment
 UL 1786 Nightlights
 UL 1950 Safety of Information Technology Equipment, Including Electrical Business Equipment
 UL 1993 Self-Ballasted Lamps and Lamp Adapters
 UL 1995 Heating and Cooling Equipment
 UL 2601-1 Medical Electrical Equipment, Part 1: General Requirements for Safety
 UL 3101-1 Electrical Equipment for Laboratory Use; Part 1: General Requirements
 UL 3111 Electrical Measuring and Test Equipment; Part 1: General Requirements
 UL 6500 Audio/Visual and Musical Instrument Apparatus for Household, Commercial, and Similar General Use
- Note:** Testing and certification of gas operated equipment is limited to Class I to equipment for use with “liquefied petroleum gas” (“LPG” or “LP-Gas”)
- At the time of preparation of the preliminary notice, some of the test standards for which OSHA currently recognizes MET, and which are listed above, have been withdrawn or replaced by the standards developing organization. Under OSHA policy regarding such withdrawn or replaced test standards, OSHA can no longer recognize the NRTL for the test standards, but the NRTL may request recognition for comparable test standards, i.e., other appropriate test standards covering similar types of product testing. However, a number of other NRTLs also are recognized for these withdrawn or replaced standards. As a result, OSHA will publish a separate notice to make the appropriate substitutions for MET and the other NRTLs that were recognized for these standards.
- OSHA’s recognition of MET, or any NRTL, for a particular test standard is limited to equipment or materials (i.e., products) for which OSHA standards require third party testing and certification before use in the workplace. Consequently, an NRTL’s scope of recognition excludes any product(s) falling within the scope of a test standard for which OSHA has no NRTL testing and certification requirements.
- Many of the test standards listed above, and listed later in this notice, are approved as American National Standards by the American National Standards Institute (ANSI). However, for convenience in compiling the list, we use the designation of the standards developing organization (e.g., UL 1012) for the standard, as opposed to the ANSI designation (e.g., ANSI/UL 1012). Under

* Testing and certification of products under this test standard is limited to Class I locations. Explosion testing is also limited to current test chamber capabilities.

our procedures, an NRTL recognized for an ANSI-approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard, regardless of whether it is currently recognized for the proprietary or ANSI version. Contact ANSI or the ANSI web site (<http://www.ansi.org>) and click "NSSN" to find out whether or not a test standard is currently ANSI-approved.

Expansion of Recognition

OSHA limits the expansion to testing and certification of products for demonstration of conformance to the following two test standards, and, as indicated above, OSHA has determined the standards are "appropriate."

UL 924 Emergency Lighting and Power Equipment

UL 1008 Transfer Switch

Conditions

MET Laboratories, Inc., must also abide by the following conditions of the recognition, in addition to those already required by 29 CFR 1910.7:

OSHA must be allowed access to the MET facility and records for purposes of ascertaining continuing compliance with the terms of its recognition and to investigate as OSHA deems necessary;

If MET has reason to doubt the efficacy of any test standard it is using under this program, it must promptly inform the organization that developed the test standard of this fact and provide that organization with appropriate relevant information upon which its concerns are based;

MET must not engage in or permit others to engage in any misrepresentation of the scope or conditions of its recognition. As part of this condition, MET agrees that it will allow no representation that it is either a recognized or an accredited Nationally Recognized Testing Laboratory (NRTL) without clearly indicating the specific equipment or material to which this recognition is tied, or that its recognition is limited to certain products;

MET must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major changes in its operations as an NRTL, including details;

MET will continue to meet all the terms of its recognition and will always comply with all OSHA policies pertaining to this recognition; and MET will continue to meet the requirements for recognition in all areas where it has been recognized.

Signed at Washington, DC this 14th day of May, 2002.

John L. Henshaw,
Assistant Secretary.

BILLING CODE 4510-26-P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[V-02-1]

American Boiler and Chimney Co. and Oak Park Chimney Corp.; Application for Permanent Variance

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Notice of an application for a permanent variance; request for comment.

SUMMARY: The American Boiler and Chimney Co. and Oak Park Chimney Corp. are applying for a permanent variance from the Occupational Safety and Health Administration (i.e., "OSHA" or "the Agency") provision that regulates the tackle used for boatswain's chairs (§ 1926.452 (o)(3)), as well as the requirements specified for personnel hoists by paragraphs (c)(1) through (c)(4), (c)(8), (c)(13), (c)(14)(i), and (c)(16) of § 1926.552. The variance application covers the use of boatswain's chairs in chimney construction work.

DATES: Submit written comments and requests for a hearing by June 24, 2002.

ADDRESSES: Submit comments in quadruplicate, or one hard copy and one diskette (3-1/2 inches) in a Word, WordPerfect, or ASCII format, to: Docket Office, Docket No. S-778-A, Room N-2634, OSHA, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693-2350. Submit any information not contained on a disk (e.g., studies, articles) in quadruplicate to the Docket Office. Commenters may transmit written comments of 10 pages or less by fax to (202) 693-1698, provided they send an original and three copies of these comments to the Docket Office by the submission date.

Send requests for a hearing to Ms. Veneta Chatmon, Office of Information and Consumer Affairs, Room N-3647, OSHA, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693-1999.

FOR FURTHER INFORMATION: For general information and press inquiries, contact Ms. Bonnie Friedman, Office of Information and Consumer Affairs,

Room N-3647, OSHA, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693-1999. Make technical inquiries to Mr. Mike Turner, Acting Director, Office of Technical Programs and Coordination Activities, Room N-3655, OSHA, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210; telephone (202) 693-2110; fax (202) 693-1644. You can obtain additional copies of this **Federal Register** notice from the Office of Publications, Room N-3101, OSHA, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington DC 20210; telephone (202) 693-1888. For electronic copies of this notice contact OSHA on the Internet at <http://www.osha.gov>, and select "Federal Register," "Date of Publication," and then "2002."

Information about this variance application is also available from the following OSHA Regional Offices:

U.S. Department of Labor, OSHA, JFK Federal Building, Room E340, Boston, MA 02203, Telephone: (617) 565-9860, Fax: (617) 565-9827.

U.S. Department of Labor, OSHA, 201 Varick St., Room 670, New York, NY 10014, Telephone: (212) 337-2378, Fax: (212) 337-2371.
