Abstract of Information Available

Human remains representing, at least, four individuals have been identified. No associated funerary objects are present. These individuals were

removed from site 14CY27/40, the Luthi site, in Clay County, Kansas by Floyd Schultz in June 1925, and donated to the University of Kansas (KU) in 1948. 14CY27/40 is a mound site with burials on a knoll near the Republican River. Ceramics removed from the Luthi site were identified in previous research as Plains Woodland and Hopewell, suggesting the site dates to c. 200 BCE–400 CE. Based on a past pattern of practice, it is likely that William Bass brought the remains from KU to UTK when he began working there in 1971. To our knowledge, no potentially hazardous substances were used to treat the remains.

Through Tribal consultation these remains were identified as culturally affiliated with the Northern Arapaho Tribe of the Wind River Reservation, Wyoming, the Kaw Nation, Oklahoma, and the Pawnee Nation of Oklahoma, based off the following types of information: expert opinion, geographical information, and historical information.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains described in this notice.

Determinations

UTK has determined that:

- The human remains described in this notice represent the physical remains of four individuals of Native American ancestry.
- There is a connection between the human remains described in this notice and the Kaw Nation, Oklahoma; Northern Arapaho Tribe of the Wind River Reservation, Wyoming; and the Pawnee Nation of Oklahoma.

Repatriation of the human remains described in this notice to a requestor may occur on or after April 18, 2025. If

competing requests for repatriation are received, UTK must determine the most appropriate requestor prior to repatriation. Requests for joint repatriation of the human remains are considered a single request and not competing requests.
