(f) The Agency recognizes that consideration of children's risk is a rapidly developing area and, therefore, the Agency intends to issue future guidance that will further refine the present guidance and possibly address other modes of action as data become available. The Agency welcomes the SAB's recommendations on other modes of action that may be most fruitful to assess in similar future analyses.

(g) The analysis presented in the current Guidance relies on neonatal and early-life exposure studies. Can the SAB recommend how to best incorporate data from transplacental or in utero exposure studies into future analyses?

(h) The Agency welcomes the SAB's recommendations on critical data needs that will facilitate the development of future guidance addressing differential lifespans susceptibility.
