

or to protest the blanket approval of issuances of securities or assumptions of liability by Pierce should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214).

Absent a request to be heard in opposition within this period, Pierce is authorized to issue securities and assume obligations or liabilities as a guarantor, indorser, surety, or otherwise in respect of any security of another person; provided that such issuance or assumption is for some lawful object within the corporate purposes of Pierce and compatible with the public interest, and is reasonably necessary or appropriate for such purposes.

The Commission reserves the right to require a further showing that neither public nor private interests will be adversely affected by continued approval of Pierce's issuances of securities or assumptions of liability.

Notice is hereby given that the deadline for filing motions to intervene or protests, as set forth above, is August 31, 2001.

Copies of the full text of the Order are available from the Commission's Public Reference Branch, 888 First Street, N.E., Washington, D.C. 20426. The Order may also be viewed on the web at <http://www.ferc.gov> using the "RIMS" link, select "Docket#" and follow the instructions (call 202-208-2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

David P. Boergers,
Secretary.

[Docket Nos. ER01-2217-000]

Sunrise Power Company, LLC; Notice of Issuance of Order

August 1, 2001.

Sunrise Power Company, LLC (Sunrise) submitted for filing a rate schedule under which Sunrise will engage in wholesale electric power and energy transactions at market-based rates. Sunrise also requested waiver of

various Commission regulations. In particular, Sunrise requested that the Commission grant blanket approval under 18 CFR Part 34 of all future issuances of securities and assumptions of liability by Sunrise.

On July 25, 2001, pursuant to delegated authority, the Director, Division of Corporate Applications, Office of Markets, Tariffs and Rates, granted requests for blanket approval under Part 34, subject to the following:

Within thirty days of the date of the order, any person desiring to be heard or to protest the blanket approval of issuances of securities or assumptions of liability by Sunrise should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214).

Absent a request to be heard in opposition within this period, Sunrise is authorized to issue securities and assume obligations or liabilities as a guarantor, indorser, surety, or otherwise in respect of any security of another person; provided that such issuance or assumption is for some lawful object within the corporate purposes of Sunrise and compatible with the public interest, and is reasonably necessary or appropriate for such purposes.

The Commission reserves the right to require a further showing that neither public nor private interests will be adversely affected by continued approval of Sunrise's issuances of securities or assumptions of liability.

Notice is hereby given that the deadline for filing motions to intervene or protests, as set forth above, is August 24, 2001.

Copies of the full text of the Order are available from the Commission's Public Reference Branch, 888 First Street, N.E., Washington, D.C. 20426. The Order may also be viewed on the web at <http://www.ferc.gov> using the "RIMS" link, select "Docket#" and follow the instructions (call 202-208-2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's web site under the "e-Filing" link.

[Docket No. CP01-417-000]

Transcontinental Gas Pipe Line Corporation; Notice of Request Under Blanket Authorization

August 1, 2001.

Take notice that on July 27, 2001, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, pursuant to Sections 157.205 and 157.208 of the Federal Energy Regulatory Commission's (the Commission) Regulations under the Natural Gas Act (NGA), as amended, and blanket certificate authority granted in Docket No. CP82-426-000, filed in Docket No. CP01-417-00 a request for authorization to modify all of its existing reciprocating engines at Compressor Station No. 170 in Appomattox County, Virginia in order to comply with the state of Virginia plan to implement the Clean Air Act Amendments of 1990 (Station 170 has 11 reciprocating/ compressor units), all as more fully set forth in the request, which is on file with the Commission, and open for public inspection. This filing may be viewed on the web at <http://www.ferc.gov> using the "RIMS" link, select "Docket #" from the RIMS Menu and follow the instructions (please call 202-208-2222 for assistance).

Transco states that it plans to install turbochargers and associated equipment on 7 of the 11 reciprocating engines in order to reduce NO_x emissions. These engines currently do not have turbochargers on them. It is stated that Transco plans to modify the existing turbochargers at the other 4 reciprocating units to increase their capacity and install associated equipment in order to reduce NO_x emissions. At all 11 engines, emissions will be reduced by achieving a true lean air-fuel ratio, injecting high-pressure fuel directly into the power cylinders and making other engine adjustments. The injection of high-pressure fuel directly into the power cylinders significantly improves the combustion process by producing a more homogeneous mixture of air and fuel within the power cylinder. The true lean air-fuel ratio coupled with the high-pressure fuel injection works by promoting stable combustion characteristics and thus reduces the formation of NO_x.

Transco further states that the 7 engines which will have turbochargers installed will have the potential to
