SUPPLEMENTARY INFORMATION: The current guidance document for human exposure assessment, *Guidelines for Exposure Assessment*, was published in 1992, reflecting the state-of-the-science in the 1970s and 1980s. Since its publication, the field of exposure

science has undergone significant transformation in methods and approaches, which EPA has incorporated into its policies and practices to better align with the current state-of-the-science. The 1992 guidelines are being updated to reflect the advancement in exposure science and assessment and Agency policies.

The draft guidelines benefit from over two decades of experience with EPA assessments conducted by Agency programs under their respective authorities and constraints, and from input from external panels, including the National Academy of Sciences and EPA's Science Advisory Board. This draft document builds on topics covered in the 1992 exposure guidelines including planning and scoping for an assessment, data acquisition and use, modeling, and considerations of uncertainty in exposure assessment. It also includes new material on planning and conducting an observational human exposure measurement study and considerations of lifestyles and sensitive populations in exposure assessments. These draft guidelines present the most current science used in EPA exposure assessments and incorporates information about the Agency's current policies.

Abstract: The affected entities are subject to the General Provisions of the NESHA (40 CFR part 63, subpart A), and any changes, or additions to the Provisions are specified at 40 CFR part 63, subpart HHHHH. Owners or operators of the affected facilities must submit initial notification reports,

performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities:

Facilities that manufacture a miscellaneous coating.

Respondent's obligation to respond:

Mandatory (40 CFR part 63, subpart HHHHH).

Estimated number of respondents: 44 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 55,800 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$6,690,000 (per year), which includes \$928,000 in either annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in respondent burden in this ICR from the most recently approved ICR. This is due to a decrease in the respondent universe. For this ICR, we have updated the estimated number of respondents based on information obtained from industry consultation. This results in a decrease in the labor hours, O&M costs, and total number of responses.

Courtney Kerwin,

Acting Director, Collection Strategies Division.
