

MM&O on the entities discussed in the initial *Report and Order*.

7. The RFA analysis adopted in the initial *Report and Order* remains correct because there is no greater burden on carriers who are donating non-initialized phones and manufacturers of "911-only" wireless devices to program these devices with 911 plus the seven least significant digits of the decimal representation of the ESN, IMEI, or other unique identifier programmed into the handset, than to program these devices with the 123-456-7890 sequential number. Also, there is no greater burden on carriers to program their networks to deliver these "telephone numbers" from carrier-donated non-service initialized phones and "911-only" handsets to PSAPs than programming their networks to deliver the 123-456-7890 sequential number from these devices.
