

Department personnel who have facility access and system access are required to undergo a security clearance investigation. Individuals requiring access to Privacy Act data are required to hold, at a minimum, a moderate-risk security clearance level. These individuals are required to undergo periodic screening at five-year intervals.

In addition to conducting security clearances, contract and Department employees are required to complete security awareness training on an annual basis. Annual security awareness training is required to ensure that contract and Department users are appropriately trained in safeguarding Privacy Act data in accordance with OMB Circular No. A-130, Appendix III.

The computer system employed by the Department offers a high degree of resistance to tampering and circumvention. This security system limits data access to Department and contract staff on a "need-to-know" basis, and controls individual users' ability to access and alter records within the system. All users of this system of records are given a unique user identification. The Department's Federal Student Aid Information Security and Privacy Policy requires the enforcement of a complex password policy. In addition to the enforcement of the complex password policy, users are required to change their password at least every 60 to 90 days in accordance with the Department's information technology standards.

At the principal site of the Department's contractor in Meriden, Connecticut, additional physical security measures are in place and access is monitored 24 hours per day, 7 days a week.
