

the expiration of this review period to object to State operating permits if EPA has not done so. Petitions must be based only on objections to the permit that were raised with reasonable specificity during the public comment period provided by the State, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or the grounds for the issues arose after this period.

Mr. Carl D. Larkins submitted a petition to the Administrator on November 24, 1999, seeking EPA's objection to the operating permit issued to Fort James Camas Mill, Camas, Washington. The petitioner maintains that the Fort James Camas Mill operating permit is inconsistent with the Act because the permit fails to: (1) provide sufficient basis for providing compliance assurance for certain permit conditions; and (2) provide sufficient basis for using surrogate parameters as compliance indicators in certain permit conditions. The order granting in part and denying in part this petition explains the reasons behind EPA's conclusion that: (1) Petitioner adequately demonstrated in certain instances that the Fort James Camas Mill permit did not satisfy all the requirements of 40 CFR Part 70; and (2) petitioner in other instances failed to demonstrate that the Fort James Camas Mill permit does not assure compliance with the Clean Air Act on the grounds raised.

Pursuant to sections 505(b) and 505(e) of the Clean Air Act (42 U.S.C. 7661d(b) and (e)) and 40 CFR 70.7(g) and 70.8(d), Ecology has 90 days from the receipt of the Administrator's order to resolve the objections identified in sections C(1), C(2), C(5), C(8), C(12), C(15), D(2), and D(5) of the order, and submit a proposed determination of termination, modification, or revocation and reissuance of the Fort James Title V permit in accordance with EPA's objection.¹
