SUPPLEMENTARY INFORMATION:

Background information and additional details on NCA5 can be found at <https://www.globalchange.gov/nca5>.

The U.S. Global Change Research Program (USGCRP) is mandated under the Global Change Research Act (GCRA) of 1990 to conduct a quadrennial National Climate Assessment (NCA) to evaluate scientific findings and uncertainties related to global change, analyze the effects of global change, and analyze the current and projected trends in global change, both human-induced and natural. Response to this notice is voluntary. Responses to this notice may be used by the government for program planning on a non-attribution basis. NOAA therefore requests that no business proprietary information or copyrighted information be submitted in response to this notice. Please note that the U.S. Government will not pay for response preparation, or for the use of any information contained in the response.

NCA5 fulfills this mandate by synthesizing and assessing the science and impacts of climate change across 2 physical science chapters, 17 national topic chapters, 10 regional chapters, and 2 response chapters. Additionally, multiple cross-cutting sections will focus on emergent topics of interest across many sectors and regions. Appendices articulate some additional details on process, rules, and tools used to develop NCA5. NCA5 assesses the science of impacts and options that reduce present and future risk in a policy-relevant but not policy-prescriptive manner. NCA5 is a product of the USGCRP and is overseen by a Federal Steering Committee. Chapter leads were identified via an open call for nominations (<https://www.federalregister.gov/documents/2020/10/15/2020-22729/request-for-public-nominations-for-authors-and-scientific-technical-inputs-and-notice-of-planned>). The draft assessment was written by teams of Federal and non-Federal authors selected for their demonstrated subject matter expertise and publications relevant to the chapter topics outlined in the prospectus (<https://www.federalregister.gov/documents/2020/07/10/2020-14904/request-for-comment-on-the-draft-prospectus-of-the-fifth-national-climate-assessment>), and was informed by an array of technical inputs, many gathered

through an open call (<https://www.federalregister.gov/documents/2020/10/15/2020-22729/request-for-public-nominations-for-authors-and-scientific-technical-inputs-and-notice-of-planned>). This report adheres to the Global Change Research Act (GCRA), Information Quality Act and The Foundations for Evidence-based Policymaking Act of 2018 requirements (<https://www.noaa.gov/organization/information-technology/policy-oversight/information-quality>) for quality, transparency, and accessibility as appropriate for a Highly Influential Scientific Assessment.
