

The recommendations of this guidance impose a minimal burden on industry. FDA estimates that 700 studies will be affected annually. Each study will result in one recordkeeping per year, estimated to take 4 hours to complete. This results in a total recordkeeping burden of 2,800 hours. ($700 \times 4 = 2,800$). FDA estimates that the cost of developing standard operating procedures (SOPs) for each recordkeeper is \$300 (6 hours of work \times \$50 /hour. This results in a total operational and maintenance cost to industry of \$210,000 ($\300×700 recordkeepers). The total cost of this recordkeeping (i.e., capital cost plus operational and maintenance cost) is estimated to be \$420,000.
