Bureau of Industry and Security

Technical Advisory Committees; Notice of Recruitment of Private-Sector Members

SUMMARY: Six Technical Advisory Committees (TACs) advise the Department of Commerce on the technical parameters for export controls applicable to dual-use commodities and technology and on the administration of those controls. The TACs are composed of representatives from industry and Government representing diverse points of view on the concerns of the exporting community. Industry representatives are selected from firms producing a broad range of goods, technologies, and software presently controlled for

national security, non-proliferation, foreign policy, and short supply reasons or that are proposed for such controls, balanced to the extent possible among large and small firms.

TAC members are appointed by the Secretary of Commerce and serve terms of not more than four consecutive years. The membership reflects the Department's commitment to attaining balance and diversity. TAC members must obtain secret-level clearance prior to appointment. These clearances are necessary so that members can be permitted access to the classified information needed to formulate recommendations to the Department of Commerce. Each TAC meets approximately 4 times per year. Members of the Committees will not be compensated for their services. The six TACs are responsible for advising the Department of Commerce on the technical parameters for export controls and the administration of those controls within the following areas: Information Systems TAC: Control List Categories 3 (electronics—semiconductor section), 4 (computers), and 5 (telecommunications and information security); Materials TAC: Control List Category 1 (materials, chemicals, microorganisms, and toxins); Materials Processing Equipment TAC: Control List Category 2 (materials processing); Regulations and Procedures TAC: the Export Administration Regulations (EAR) and procedures for implementing the EAR; Sensors and Instrumentation TAC: Control List Categories 3 (electronics—instrumentation section) and 6 (sensors and lasers); Transportation and Related Equipment TAC: Control List Categories 7 (navigation and avionics), 8 (marine technology), and 9 (propulsion systems, space vehicles, and related equipment).

This information will be used to monitor the level of incidental take in the state-managed Virginia pound net fishery and ensure that the seasonal pound net leader restriction (50 CFR

223.206(d)(2)(v)) is adequately protecting listed sea turtles.

II. Method of Collection

At any time during the year, if a sea turtle is taken live and uninjured in any portion of the pound net operation, in the pound, heart, or leader, the operator of the vessel would be required to report the incident to the NMFS Northeast Regional Office within 24 hours of returning from the trip in which the incidental take was discovered. At any time during the year, if a sea turtle is taken in a pound net operation, and is determined to be injured, or if a sea turtle is captured dead, the operator of the vessel would be required to immediately notify the NMFS Northeast Regional Office and the appropriate rehabilitation or stranding network, as determined by the NMFS Northeast Regional Office.
