SUPPLEMENTARY INFORMATION:

I. Abstract

Nature and the outdoors have always been an important part of the fabric of American life. But, there are major questions about the present and future role of nature and the outdoors in our increasingly diverse, technologically oriented, and rapidly changing society. For our programs to remain relevant to American life today and tomorrow, we must be aware of public sentiment toward the part nature plays in the quality of our lifestyles.

It is for these reasons that we plan to use a quantitative survey to collect: Information on the attitudes that the public maintains towards the natural environment; the effects of contact with nature on participants' health and quality of life; the extent of contact with

nature and obstacles to greater contact with nature; general knowledge of nature and wildlife; concerns toward selected environmental issues; and socio-demographic variables. Results will help improve the design and delivery of new or existing programs aimed at engaging the public in nature-related activities (e.g., outreach and educational programming at national wildlife refuges and national fish hatcheries).
