

Winter Range Emphasis). The lower elevations and south aspects on the east side of the project area currently provide appropriate and important winter range for deer and elk and are utilized as such. However, the remainder of the project area is heavily used by deer and elk only during the spring, summer, and fall, including calving and fawning periods. Therefore, the Forest proposes to change the Management Area designation in a portion of the project area to MA 5.6 (Forest Products, Recreation, and Big Game Emphasis) to reflect the actual utilization and better manage the project area to benefit a variety of wildlife, including big game species, and better reflect existing non-motorized recreation opportunities. Amendments area also proposed to allow reduction of density in certain stands that provide big game thermal cover and to allow treatment of three stands in goshawk post-fledging family areas.

- Providing a mix of motorized and non-motorized opportunities and protecting wildlife in the area by closing the project area to off-road motorized travel and restricting ATV use to designated routes. Main system routes currently open to motorized travel would remain open. Approximately 23.5 miles of roads would also be decommissioned.

Alternatives Consider

Four alternatives were analyzed in detail in the Draft EIS. These alternatives were:

- Alternative A, No Action—Proposed actions would be deferred at this time.
- Alternative B—Promote late succession habitat and increase diversity while reducing fuels and insect infestation risk; amend the Forest Plan to allow deviations from thermal cover and goshawk standards.
- Alternative C—Proposed Action—Aggressively treat forest vegetation to reduce fire and fuels hazards; prohibit off-road motorized travel in the project area; amend the Forest Plan to allow for a change in management area designation and deviations from thermal cover and goshawk standards.
- Alternative D—Focus treatments near private lands and in other strategic locations; de-emphasize the use of commercial timber harvest and feature broadcast burning and fuel breaks; amend the Forest Plan to allow deviations from thermal cover guidelines.

Alternative C was the preferred alternative in the Draft EIS.
