

(4) Approval of coverage under a general permit shall be determined by the Executive Director or by any other manner that the Commission shall establish for any general permit.

(5) The Commission may set a fee for NOIs to any general permit.

(6) A project sponsor shall provide notice for NOIs in accordance with § 806.15(h) and any additional notice requirements that the Commission may adopt for any general permit.

(7) The requirements of § 806.16 apply to the review of NOIs to any general permit.

(8) Upon reissuance or amendment of a general permit, all project sponsors permitted to divert, withdraw or consumptively use water in accordance with the previous general permit shall be permitted to continue to operate with the renewed or modified general permit unless otherwise notified by the Commission.

(9) Notice of receipt of NOIs shall be published on the Commission's Web site and in any other manner that the Commission shall establish for any general permit.

(d) *Denial of coverage.* The Executive Director will deny or revoke coverage under a general permit when one or more of the following conditions exist:

(1) The project or project sponsor does not or can no longer meet the criteria for coverage under a general permit.

(2) The diversion, withdrawal or consumptive use, individually or in combination with other similar Commission regulated activities, is causing or has the potential to cause adverse impacts to water resources or competing water users.

(3) The project does not comport with § 806.21(a) or (b).

(4) The project includes other diversions, withdrawals or consumptive uses that require an individual approval and the issuance of both an individual approval and a general permit for the project would constitute an undue administrative burden on the Commission.

(5) The Executive Director determines that a project cannot be effectively regulated under a general permit and is more effectively regulated under an individual approval.

(e) *Requiring an individual approval.* If coverage is denied or revoked under paragraph (d) of this section, the project sponsor shall be notified in writing. The notice will include a brief statement for the reasons for the decision. If coverage under a general permit was previously granted, the notice will also include a deadline for submission of an application for an individual approval. Timely submission of a complete

application will result in continuation of coverage of the applicable withdrawal, consumptive use or diversion under the general permit, until the Commission takes final action on the pending individual approval application.

(f) *Action of the Commission.* Action by the Executive Director denying or revoking coverage under a general permit under paragraph (d) of this section, or requiring an individual approval under paragraph (e) of this section, is not a final action of the Commission until the project sponsor submits and the Commission takes final action on an individual approval application.

■ 7. Add § 806.18 to read as follows:

§ 806.18 Approval modifications.

(a) *General.* A project sponsor shall submit an application for modification of a current approval prior to making a change in the design, operational plans, or use as presented in the application upon which the approval was originally issued, and that will affect the terms and conditions of the current approval.

(b) *Applications for modification.* A project sponsor may apply for a modification of a current approval by submitting an application for modification to the Commission.

(c) *Minor modifications.* The following are minor modifications:

(1) Correction of typographical errors;

(2) Changes to monitoring or metering conditions;

(3) Addition of sources of water for consumptive use;

(4) Changes to the authorized water uses;

(5) Changes to conditions setting a schedule for developing, implementing, and/or reporting on monitoring, data collection and analyses;

(6) Changes to the design of intakes;

(7) Increases to total system limits that were established based on the projected demand of the project; and

(8) Modifications of extraction well network used for groundwater remediation systems.

(d) *Major modifications.* Major modifications are changes not considered to be minor modifications. Major modifications may include, but are not limited to:

(1) Increases in the quantity of water withdrawals, consumptive uses or diversions;

(2) Increases to peak day consumptive water use;

(3) Increases to the instantaneous withdrawal rate or changes from a single withdrawal rate to a varied withdrawal rate;

(4) Changes affecting passby flow requirements; and

(5) Changes that have the potential for adverse impacts to water resources or competing water users.

(e) *Notice and approval.* (1)

Applications for modifications are subject to the notice requirements of § 806.15.

(2) The Commission or Executive Director may approve, approve with conditions or deny an application for minor modification, or direct that an application for major modification be made.

(3) The Commission may approve, approve with conditions or deny an application for major modification.
