SUPPLEMENTARY INFORMATION: The NRC anticipates reviewing applications for licensing a mixed oxide (MOX) fuel fabrication facility under 10 CFR Part 70. The MOX fuel fabrication facility is a plutonium processing and fuel fabrication plant. Specifically, 10 CFR Part 70 requires that applicants for plutonium facilities obtain the NRC's approval prior to initiating construction and the NRC must later confirm that the facility is constructed in accordance with the license application. As a result, the NRC expects to receive two separate submittals: (1) an application for construction approval and (2) a license application.

The NRC prepared draft NUREG-1718, "Standard Review Plan for the Review of an Application for a Mixed Oxide (MOX) Fuel Fabrication Facility," as a MOX specific standard review plan (SRP). In addition to addressing facility specific hazards, draft NUREG-1718 provides the staff with review guidance for the application for construction approval and the license application. Additionally, the NRC is currently considering revisions to 10 CFR Part 70 and the associated SRP, draft NUREG-1520, "Standard Review Plan for the Review of a License Application for a Fuel Cycle Facility," (see <http://techconf.llnl.gov/cgi-bin/topics>). To the extent appropriate, revisions to finalize draft NUREG-1718 will reflect NRC program changes to 10 CFR Part 70 and the accompanying SRP.

For the Nuclear Regulatory Commission.

Dated at Rockville, Maryland, this 12th day of January, 2000.

Michael F. Weber,

Director, Division of Fuel Cycle Safety and Safeguards, NMSS.
