

reflect program practices and support HRSA's analysis and understanding of program impact. Specifically, the Recipient Report includes the following proposed changes:

- Replacement of the Recertification Date variable with the Last Date of Eligibility Confirmation will remove the previous 6-month recertification requirement, which is no longer required by policy, *see* Policy Clarification Notice 21-02, and allow Recipients to report the latest eligibility confirmation date for existing clients;
- Reinstate a question that was inadvertently removed from the 2021 ADR that is needed to assess the quality of medication data; and
- Change the DUNS number variable to Unique Entity Identifier. On April 4, 2022, the federal government stopped using DUNS numbers, making it less burdensome for entities to do business with the federal government. As a result, Recipients no longer have to report the DUNS number in the ADR.

HRSA does not anticipate these proposed revisions resulting in a change in the reporting burden. New and revised data elements require reporting of information that should already be collected by recipients to meet legislative or programmatic requirements for the proper oversight and administration of the program.

Need and Proposed Use of the Information: RWHAP requires the submission of annual reports by the Secretary of Health and Human Services to the appropriate committees of Congress. HRSA uses the ADR to evaluate the national impact of the RWHAP ADAP by providing deidentified client-level data on individuals being served, services being delivered, and costs associated with these services. The client-level data is used to monitor health outcomes of people with HIV receiving care and treatment through the RWHAP ADAP, to monitor the use of RWHAP ADAP funds in addressing the HIV epidemic

and its impact on communities, and to track progress toward achieving the goals identified in the National HIV/AIDS Strategy.

Likely Respondents: State ADAPs of RWHAP Part B recipients.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Grantee Report	54	1	54	6	324
Client-Level Report	54	1	54	81	4,374
Total	54	54	4,698

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.
