If MARAD determines, in accordance with Public Law 105-383 and MARAD's regulations at 46 CFR Part 388 (68 FR 23084; April 30, 2003), that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be

granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. ACTION: Request for public comment on proposed collection of information.

Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatements of previously approved collections. FOR FURTHER INFORMATION CONTACT:

Jonathan Walker, Ph.D., Contracting Officer's Technical Representative, Office of Regulatory Analysis and Evaluation, National Highway Traffic Safety Administration, 1200 New Jersey AVE, SE., Room W53-463, Washington, DC 20590. Dr. Walker's phone number is 202-366-8571 and his e-mail address is Jonathan.Walker@dot.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995, before an agency submits a proposed collection of information to OMB for approval, it must publish a document in the **Federal Register** providing a 60-day comment period and otherwise consult with members of the public and affected agencies concerning each proposed collection of information. The OMB has promulgated regulations describing what must be included in such a document. Under OMB's regulations (at 5 CFR 1320.8(d)), an agency must ask for public comment on the following:

- (i) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (ii) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- (iii) How to enhance the quality, utility, and clarity of the information to be collected; and

- (iv) How to minimize the burden of the collection of information on those who are to respond, including the use

of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

In compliance with these requirements, NHTSA asks public comment on the following proposed collection of information:

2008 National Survey on Reported and Unreported Motor Vehicle Crashes

Type of Request—New information collection requirement.

OMB Clearance Number—None.

Form Number—This collection of information uses no standard forms.

Requested Expiration Date of Approval—August 30, 2009.

Summary of the Collection of Information—NHTSA proposes to conduct a National Survey on Reported and Unreported Motor Vehicle Crashes by telephone among a sample of 2,000 adults (age 16 and older) who were involved in a motor vehicle crash in the past twelve months. Participation by respondents would be voluntary. NHTSA's information needs require a telephone survey on a national probability sample of drivers in the United States that will allow national estimates of the annualized incidence and severity of unreported crashes in the United States to be made. The questionnaire focuses on the extent of any injuries and property damage which were a result of the crash the respondent was involved in. Standard demographics are asked at the end of the interview.

In conducting the proposed survey, the interviewers would use computer-assisted telephone interviewing to reduce interview length and minimize recording errors. A Spanish-language translation and bilingual interviewers would be used to minimize language barriers to participation. The proposed survey would be anonymous and confidential.

Description of the Need for the information and Proposed Use of the Information—The National Highway Traffic Safety Administration (NHTSA) was established to reduce the mounting number of deaths, injuries and economic losses resulting from motor vehicle crashes on the Nation's highways. As part of this statutory mandate, NHTSA is authorized to conduct research as a foundation for the development of motor vehicle standards and traffic safety programs. In 1981, the National Highway Traffic Safety Administration (NHTSA) published the results of a telephone survey: NATIONAL ACCIDENT SAMPLING SYSTEM, NONREPORTED ACCIDENT
