

also serve a copy of the document on that resource agency. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

k. *Description of Request:* Upper Peninsula Power Company has filed an Environmental Report addressing its intent to rebuild the Silver Lake Reservoir, part of the Dead River Hydroelectric Project (FERC No. 10855). The project consists of three separate developments: Silver Lake, Dead River (Hoist), and McClure. Silver Lake serves as a storage reservoir for downstream power generation. In May 2003, an emergency fuse plug on the Silver Lake Reservoir activated, resulting in the release of a large quantity of water, rock and sediment downstream. A river recovery project has been implemented, however, the elevation of the reservoir is significantly reduced. The licensee is proposing to rebuild Silver Lake Reservoir, which requires constructing a new dam #2 to replace the prior emergency fuse plug, raising the height of the main dam and a series of smaller dikes and dams that contain the reservoir, adding a new spillway, and raising the level of the current service spillway to the height of the main dam, ending its function as a spillway.

The Commission intends to prepare an environmental document under the National Environmental Policy Act (NEPA) for the Silver Lake Reservoir rebuilding project. The NEPA document will be used by the Commission to identify environmental impacts and to identify measures that would help mitigate the impacts caused by rebuild activities.
