SUPPLEMENTARY INFORMATION

I. Abstract

The Technology Opportunities Program (TOP) promotes the widespread availability and use of digital network technologies in the public and non-profit sectors. To accomplish this objective, TOP provides matching grants to state, local, and tribal governments and non-profit entities for model projects that demonstrate innovative uses of digital network technologies in underserved communities. TOP projects address specific challenges and realize opportunities for change in such areas as lifelong learning, community and economic development, government and public services, safety, health, culture, and the arts.

Since 1994, TOP has made matching grants to state, local and tribal governments, health care providers, schools, libraries, police departments, and community-based non-profit organizations. To date, TOP has awarded 530 grants, in all 50 states, Puerto Rico, the District of Columbia, and the U.S. Virgin Islands, totaling \$192.5 million and leveraging \$268 million in local matching funds.

As part of TOP's process to select projects for funding, external experts are used to review applications. Collection of information about potential reviewers is used to determine their eligibility and availability and to facilitate payment for services rendered if they are selected to review.

Currently, TOP is exploring options to redesign the processes for becoming a reviewer of grant applications. The goals of the redesign process are to improve the ease for registering to become a reviewer and reduce the cost (to the agency) of the identification, selection, and notification of an individual's review status. To accomplish these goals, TOP proposes to offer both an Internet-based and a paper-based form for the submission of reviewer information.

II. Method of Collection

Electronic and paper form.
