Purchasers of the Slice product and benefits provided as a cash payment in settlement of the Residential Exchange Program will also be eligible for the C&R Discount.

Customers purchasing under the Industrial Firm Power rate (IP-02) will be eligible to the extent that the C&R Discount does not reduce their effective rate below the DSI floor rate. Regional public agency customers with Pre-Subscription contracts with collared pricing provisions may be eligible for the C&R Discount subject to contract provisions.

The amount of the C&R Discount will be a fixed monthly amount based on the customer's forecasted purchases and Residential Exchange Program settlement benefits from BPA under its Subscription contract.

The Northwest Power Planning Council (Council) formed a Regional Technical Forum (RTF) to facilitate the development of conservation and renewable resources in the Pacific Northwest and assist BPA in implementing a conservation and renewables discount on BPA's new rates. The RTF was asked, by BPA, to make the following recommendations to BPA to facilitate the operation of the conservation and renewable resources discount program.

- A list of eligible conservation measures and programs, their estimated savings, and the estimated regional power system value associated with those savings.

- A process for updating the list as technology and standard practices change and an appeals process through which customers can demonstrate that different savings and value estimates should apply.

- A set of protocols by which the savings and system value of measures/programs not on the list could be estimated. These would include complex commercial or industrial projects.

- Recommended protocols for measurement and evaluation of savings.

With respect to renewables, the RTF was asked to:
