

The decrease in respondent burden for Notification of Regulated Waste Activity has occurred for two primary reasons. First, there was a decrease in the estimated total number of notifications under RCRA section 3010; 40 CFR part 273, subpart C; and 40 CFR part 279. Second, the burden associated with the notification activities decreased because of adjustments made to the hourly burden estimates for the Site ID Form. In addition, adjustments were made to the hourly burden estimates for the Site ID Form to take into account the option given to respondents in the Site ID Form's instructions to use their most recently submitted form in making a subsequent notification. These optional procedures relieve them of the need to complete the form in its entirety. These adjustments do not reflect any change in requirements; they represent instead a more accurate representation of the burden that respondents will incur as a result of this information collection.

The decrease in respondent burden and State agency burden estimates for the Hazardous Waste Report occurred because there was a decrease in the projected number of respondents and Hazardous Waste Report forms.
