a. The amended J2 test procedure does not have a clear definition for testing a user adjustable fixed WFCS. Based on other similar products on the market that have a Deep Fill option and the fact that our R16 basic model interacts with the user in the same manner, we believe that testing using the procedure defined for user adjustable adaptive WFCS is appropriate for this product. If the waiver were to be denied and our R16 basic model had to be taken off the market, it would result in the loss of about 40% of our retail top load washer sales and the accompanying dryers.
