

their yards after heavy rains. However, the main factor that is contributing to flooding in the McGirts Creek floodplain is not Site related; the construction of dams by beavers in McGirts Creek is responsible for flooding problems in the area. In the past, the beaver dams were removed by the Site contractors as a courtesy, but has never been part of the actual OM&M Plan requirements. The beaver dam issue has been communicated to the residences of the surrounding neighborhood and the residents are responsible for taking any action to remove beaver dams in the future.

Determination That the Site Meets the Criteria for Deletion in the NCP

The implemented remedy achieves the degree of cleanup and protection specified in the RODs for the Site for all pathways of exposure. The selected remedy at the Site is protective of human health and the environment because all exposure pathways that could result in unacceptable risks are being controlled. Contamination remaining onsite is being contained to the capped portion. The barrier walls were designed and constructed to contain the contamination and prevent any lateral or vertical movement of groundwater in or out of the containment area; ICs are in place in the form of land and groundwater use restrictions. These ICs are in the form of a Declaration of Restrictive Covenant executed between FDEP and the City of Jacksonville. This IC was executed on the 2nd of February 2011, and restricts activities on the property and the future use of the property. All selected remedial and removal actions, remedial action objectives, and associated cleanup goals are consistent with the EPA policy and guidance; the EPA has followed the procedures required by 40 CFR 300.425(e) and these actions, objectives and goals have all been achieved and, therefore, no further Superfund response is needed to protect human health and the environment.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 300

[EPA–HQ–SFUND–1989–0007; FRL–9980–69—Region 5]

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Partial Deletion of the Naval Industrial Reserve Ordnance Plant Superfund Site

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; notification of intent.

SUMMARY: The Environmental Protection Agency (EPA) Region 5 is issuing a Notice of Intent to Delete Operable Unit 3 (OU3) of the Naval Industrial Reserve Ordnance Plant (NIROP) Superfund Site (Site), located in Fridley, Minnesota, from the National Priorities List (NPL) and requests public comments on this proposed action. The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). EPA and the State of Minnesota, through the Minnesota Pollution Control Agency (MPCA), have determined that all appropriate response actions at the OU, identified under CERCLA, other than operation, maintenance, and five-year reviews, have been completed. However, this partial deletion does not preclude future actions under Superfund. This partial deletion pertains to the OU3 portion of the NIROP Site, which includes all the unsaturated soils underlying the former Plating Shop Area of the NIROP Superfund Site.

DATES: Comments must be received by August 16, 2018.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA–HQ–SFUND–1989–0007, by mail to Randolph Cano, NPL Deletion Coordinator, U.S. Environmental Protection Agency Region 5 (SR–6J), 77 West Jackson Boulevard, Chicago, IL 60604. Comments may also be submitted electronically or through hand delivery/courier by following the

detailed instructions in the **ADDRESSES** section of the direct final rule located in the Rules section of this issue of the **Federal Register**.

FOR FURTHER INFORMATION CONTACT:

Randolph Cano, NPL Deletion Coordinator, U.S. Environmental Protection Agency Region 5 (SR–6J), 77 West Jackson Boulevard, Chicago, IL 60604, (312) 886–6036, email: cano.randolph@epa.gov.

SUPPLEMENTARY INFORMATION: In the “Rules and Regulations” section of this issue of the **Federal Register**, we are publishing a direct final Notice of Partial Deletion for OU3 of the NIROP Superfund Site without prior Notice of Intent for Partial Deletion because EPA views this as a noncontroversial revision and anticipates no adverse comment. We have explained our reasons for this partial deletion in the preamble to the direct final Notice of Partial Deletion, and those reasons are incorporated herein. If we receive no adverse comment(s) on this partial deletion action, we will not take further action on this Notification of Intent for Partial Deletion. If we receive adverse comment(s), we will withdraw the direct final Notice of Partial Deletion, and it will not take effect. We will then, as appropriate, address all public comments in a subsequent final Notice of Partial Deletion based on this Notification of Intent for Partial Deletion. We will not institute a second comment period on this Notification of Intent for Partial Deletion. Any parties interested in commenting must do so at this time.

For additional information, see the direct final Notice of Partial Deletion which is located in the “Rules and Regulations” section of this issue of the **Federal Register**.
