Total Annual Burden: 6.5 hours.

Annual Cost Burden: \$1,850

Needs and Uses: The Federal Communications Commission (“Commission”) is requesting that the Office of Management and Budget (OMB) to approve a revision to OMB Control No. 3060–1029—Data Network Identification Code (DNIC). The Commission is developing revised and new electronic forms for this collection as part of the Commission’s modernization of its online, web-based electronic filing system—the International Bureau filing system (IBFS). This Supporting Statement seeks approval for the new and revised forms to request an International Signaling Point Code (ISPC), and reflects changes in the costs and burdens associated with these applications.

A Data Network Identification Code (DNIC) is a unique, four-digit number designed to provide discrete identification of individual public data networks. The DNIC is intended to identify and permit automated switching of data traffic to particular networks. The DNIC is the central device of the international data numbering plan developed by the International Telecommunications Union (ITU) and set forth in Recommendation X.121. Prior to the availability of electronic web-based application forms in 1999, the Commission used an informal process for assigning DNICs. In the informal system, a company desiring a code would notify the Commission that it wishes one assigned and demonstrate that it has the ability to originate and terminate international traffic (e.g., by showing an interconnection arrangement with a U.S. international carrier) and the Commission would assign a DNIC. In 1986, the Commission established procedures for the assignment of DNICs to interested data network operators. Today, the operators of public data networks file an application for a DNIC in IBFS. The DNIC is obtained on a one-time only basis unless there is a change in ownership or the owner chooses to relinquish the code to the Commission.

IBFS Modernization of DNIC Electronic Forms. The Commission seeks OMB approval of revisions to its DNIC application form and the addition of new forms that will be electronically filed through IBFS. The new online forms will ensure the Commission collects the information required by the Commission’s rules. The use of such

online forms will reduce costs and administrative burdens on applicants, resulting in greater efficiencies, and improve transparency to the public. Once the Commission receives approval for the new forms from OMB, as required by section 1.10006 of the Commission’s rules, we will announce the availability of mandated e-forms and their effective dates.

Federal Communications Commission.

SUPPLEMENTARY INFORMATION:

Title of Collection: Funeral Industry Practice Rule, 16 CFR part 453.

OMB Control Number: 3084–0025.

Type of Review: Extension without change of currently approved collection.

Abstract: The Funeral Rule ensures that consumers who are purchasing funeral goods and services have access to accurate itemized price information so they can purchase only the funeral goods and services they want or need. Among other things, the Rule requires a funeral provider to: (1) provide consumers a copy of the funeral provider’s General Price List that
