North Atlantic Coast Comprehensive Study

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of Study Initiation.

SUMMARY: The Congressional response to the devastation in the wake of Hurricane Sandy included a mandate to collaborate with federal, state, tribal and local government agencies to regionally address the vulnerability of coastal populations at risk within the boundaries of the U.S. Army Corps of Engineers (USACE) North Atlantic Division. The goals of the North Atlantic Coast Comprehensive Study authorized under the Disaster Relief Appropriations Act, Public Law 113-2, are to (1) reduce flood risk to vulnerable coastal populations, and (2) promote coastal resilient communities to ensure a sustainable and robust coastal landscape system, considering future sea-level rise and climate change scenarios. In addition, the Comprehensive Study will identify activities warranting further analysis and institutional barriers to comprehensive implementation. A draft of the North Atlantic Coast Comprehensive Study will be available for public review and comment in early 2014 and a final report is due to Congress in January 2015. The study will identify those areas warranting more detailed evaluations; however, USACE is not authorized to develop designs or implement such projects at this time. Although potential environmental impacts will be generally evaluated, National Environmental Policy Act (NEPA) compliance processes will not be completed due to the scale of the study. Full NEPA and other environmental compliance would be required as part of future detailed evaluations before any actions could be implemented.
