

2007 Census of Governments, to obtain current addresses and to identify new districts. The quinquennial Census of Governments enumerates five types of local governments: County governments, municipal governments, township governments, school district governments, and special district governments. Lists of county, municipal and township governments are kept up-to-date through the Boundary and Annexation Survey conducted annually by the Geography Division of the Census Bureau. However, there is no national source of information on special district governments. We, therefore, enlist the help of county clerks, and similar county officials to provide information on changes in special districts, including the creation of new districts, disincorporation of existing districts, and address changes. An updated list is necessary for the subsequent phases of the Census of Governments to ensure complete coverage and minimize the number of postmaster returns and remailings caused by inaccurate addresses.

Affected Public: State, local or Tribal government.

Frequency: Every 5 years.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C. 161.

OMB Desk Officer: Susan Schechter, (202) 395-5103.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to revise the current OMB clearance to add a quarterly version of the Survey of Plant Capacity Utilization (SPCU). The SPCU is currently conducted annually, collecting data for fourth quarter operations. The annual survey collects, from manufacturing plants and publishers, the value of actual production and the value of production that could have been achieved if operating at "full production" and "emergency production" levels. The survey also collects data on work patterns by shift. These data include hours in operation, production workers, and plant hours worked. This annual survey will not change, it will continue to collect fourth quarter data.

The quarterly SPCU, form MQ-C2 will collect a subset of the annual survey for the first, second and third quarters. These data include actual and full production estimates as well as work pattern data for days of the week in operation, hours per week in operation, weeks in operation during
