### Description

At an unknown date, human remains representing, at minimum, one individual were removed from Clark County, NV. Subsequently, these human remains were part of a collection kept at the UCR Radiocarbon Laboratory and under the direction of Dr. R. Ervin Taylor. When Taylor retired in 2003, the lab was decommissioned, and Taylor removed the records and remaining sample materials to his private residence. When Dr. Taylor passed away in 2019, these records and samples were transferred to the UCR Library, whereupon these human remains were discovered among the samples. Not until September of 2021 were UCR NAGPRA Staff able to find documentation concerning the removal of these human remains. Radiocarbon dates suggest a date of A.D. 1220 +/- for the remains. No known individual was identified. The 12 associated funerary objects are two ash samples, one lot of carbonized corn cobs, three flaked-stone chips, four animal bones, one lot of pollen samples, and one lot of charcoal.
