

appropriate retail analogue exists within Verizon's systems, in a manner that permits competitors a meaningful opportunity to compete. In addition, regarding specific areas where the Commission identifies relatively minor issues with Verizon's OSS performance in New Hampshire—order processing notifiers, flow-through, and billing accuracy—these problems are not sufficient to warrant a finding of checklist noncompliance.

9. *Checklist Item 4—Unbundled Local Loops.* Verizon demonstrates that it provides unbundled local loops in accordance with the requirements of section 271 and our rules, in that it provides "local loop transmission from the central office to the customer's premises, unbundled from local switching or other services." More specifically, Verizon establishes that it provides access to loop make-up information in compliance with the *UNE Remand Order* and nondiscriminatory access to stand alone xDSL-capable loops and high-capacity loops. Also, Verizon provides voice grade loops, both as new loops and through hot-cut conversions, in a nondiscriminatory manner. Finally, Verizon has demonstrated that it has a line-sharing and line-splitting provisioning process that affords competitors nondiscriminatory access to these facilities.

Other Checklist Items

10. *Checklist Item 1—Interconnection.* Based on the evidence in the record, the Commission concludes that Verizon provides access and interconnection on terms and conditions that are just, reasonable and nondiscriminatory, in accordance with the requirements of section 251(c)(2) and as specified in section 271, and applied in the Commission's prior orders. Pursuant to this checklist item, Verizon must allow other carriers to interconnect their networks to its network for the mutual exchange of traffic, using any available method of interconnection at any available point in Verizon's network. Verizon's performance generally satisfies the applicable benchmark or retail comparison standards for this checklist item.

11. *Checklist Item 11—Local Number Portability.* Section 251(b)(2) requires all LECs "to provide, to the extent technically feasible, number portability in accordance with requirements prescribed by the Commission." Based on the evidence in the record, the Commission finds that Verizon complies with the requirements of checklist item 11. As noted elsewhere in the order, Verizon uses the same

processes and procedures relating to unbundled loops in Delaware as it does in Pennsylvania. Therefore, because there is insufficient data in Delaware, we look to Verizon's performance in Pennsylvania as a basis for our evaluation, and it has met the benchmark standard for this measurement in Pennsylvania in each relevant month.

12. *Checklist Items 3, 5, 6, 7, 8, 9, 10, 12, 13 and 14.* An applicant under section 271 must demonstrate that it complies with checklist item 3 (access to poles, ducts, and conduits), item 5 (unbundled local transport), item 6 (unbundled local switching), item 7 (911/E911 access and directory assistance/operator services), item 8 (white pages directory listings), item 9 (numbering administration), item 10 (databases and associated signaling), item 12 (local dialing parity), item 13 (reciprocal compensation), and item 14 (resale). Based on the evidence in the record, the Commission concludes that Verizon demonstrates that it is in compliance with checklist items 3, 5, 6, 7, 8, 9, 10, 12, 13 and 14 in New Hampshire and Delaware.

13. *Section 272 Compliance.* Based on the record, Verizon provides evidence that it maintains the same structural separation and nondiscrimination safeguards in Delaware and New Hampshire as it does in Pennsylvania, New York, Connecticut, and Massachusetts—states in which Verizon has already received section 271 authority. Therefore, the Commission concludes that Verizon has demonstrated that it is in compliance with the requirements of section 272.

14. *Public Interest Analysis.* The Commission concludes that approval of this application is consistent with the public interest. From its extensive review of the competitive checklist, which embodies the critical elements of market entry under the Act, we find that barriers to competitive entry in the local exchange markets have been removed and the local exchange markets in New Hampshire and Delaware are open to competition. The Commission further finds that, as noted in prior section 271 orders, BOC entry into the long distance market will benefit consumers and competition if the relevant local exchange market is open to competition consistent with the competitive checklist. Verizon demonstrates that there is significant local competition in Delaware and New Hampshire, that Verizon's local market will remain open to competition, and that section 271 approval would enhance local and long distance competition in Delaware and New Hampshire.

15. *Section 271(d)(6) Enforcement Authority.* Working with each of the state commissions, the Commission intends to closely monitor Verizon's post-approval compliance to ensure that Verizon continues to meet the conditions required for section 271 approval. It stands ready to exercise its various statutory enforcement powers quickly and decisively in appropriate circumstances to ensure that the local market remains open in each of the states.
