Proposed Project: Minimum Data Elements (MDEs)/System for Technical Assistance Reporting (STAR) for the National Breast and Cervical Cancer Early Detection Program (NBCCEDP) OMB No. 0920-0571—Extension—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background

The NBCCEDP was established in response to the Congressional Breast and Cervical Cancer Mortality Prevention Act of 1990. This act mandates a program that will provide early detection of breast and cervical cancer screening services for under-served women.

CDC proposes to aggregate breast and cervical cancer screening, diagnostic and treatment data from NBCCEDP grantees at the state, territory and tribal

level. These aggregated data will include demographic information about women served through funded programs. The proposed data collection will also include infrastructure data about grantee management, public education and outreach, professional education, and service delivery.

Breast cancer is a leading cause of cancer-related death among American women. The American Cancer Society estimates that 203,500 new cases will be diagnosed among women in 2002, and 39,600 women will die of this disease. Mammography is extremely valuable as an early detection tool because it can detect breast cancer well before the woman can feel the lump, when it is still in an early and more treatable stage. Women older than age 40 that receive annual mammography screening reduce their probability of breast cancer mortality and increase their treatment options.

Although early detection efforts have greatly decreased the incidence of invasive cervical cancer during the last four decades, an estimated 13,000 new cases will be diagnosed in 2002 and 4,100 women will die of this disease. Papanicolaou (Pap) tests effectively

detect precancerous lesions in addition to invasive cervical cancer. The detection and treatment of precancerous lesions can prevent nearly all cervical cancer-related deaths.

Because breast and cervical cancer screening, diagnostic and treatment data are already collected and aggregated at the state, territory and tribal level, the additional burden on the grantees will be small. Implementation of this program will require grantees to report a minimum data set (MDE) on screening and follow-up activities electronically to the CDC on a semi-annual basis. The program will require grantees to report infrastructure data (STAR) to the CDC annually using a web-based system. Information collected will be used to obtain more complete breast and cervical cancer data, promote public education of cancer incidence and risk, improve the availability of screening and diagnostic services for under-served women, ensure the quality of services provided to women, and develop outreach strategies for women that are never or rarely screened for breast and cervical cancer. Data collection will continue for the next three years. There are no costs to respondents.

Reports	Number of respondents *	Number of responses/respondent	Average burden/response (in hours)	Total burden (in hours)
* Infrastructure Report (STAR)	71	1	25	1,775
* Screening and Follow-up (MDE)	71	2	4	568
Total				2,343

* Respondents include State, territorial and tribal grantees.

Dated: December 12, 2002.

Nancy E. Cheal,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention.

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) publishes a list of information collection requests under review by the Office of Management and Budget (OMB) in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). To request a copy of these

requests, call the CDC Reports Clearance Officer at (404) 498-1210. Send written comments to CDC, Desk Officer, Human Resources and Housing Branch, New Executive Office Building, Room 10235, Washington, DC 20503. Written comments should be received within 30 days of this notice.

Proposed Project: Reader Evaluations of Public Health Assessments and Other Products (OMB No. 0923-0016)—Reinstatement with change—The Agency for Toxic Substances and Disease Registry (ATSDR) is mandated pursuant to the 1980 Comprehensive Environmental Response Compensation and Liability Act (CERCLA) and its 1986 Amendments, The Superfund Amendments and Reauthorization Act (SARA) to perform health assessments for each facility on the National Priorities List and for releases or facilities where individuals have been exposed to a hazardous substance. In addition, ATSDR provides consultations on health issues relating to exposure to

hazardous or toxic substances to officials at the Environmental Protection Agency (EPA), and state and local government. The principal audiences for these products are health professionals at the federal, state, and local levels, staff in public libraries and repositories, interested private sector organizations and groups, and members of the public.

In order to make ATSDR products such as health assessments, consultations, exposure investigations, and fact sheets timely and relevant, ATSDR staff developed a survey questionnaire (OMB No. 0923-0016) to get readers' opinions and evaluations. The survey will be inserted and mailed in each public health assessment. In addition, electronic surveys will be sent to clients and partners requesting ATSDR health consultations and exposure investigations within 1 month following delivery of product or service. The survey collects information on (a) Affiliation of users, (b) timeliness and

effectiveness of these products, and (c) practical utility of these products.

The reader evaluation surveys provide important feedback that enables ATSDR staff to maintain the utility, integrity

and standards of its products. Gathering client feedback ensures that appropriate information is included in these documents and assists in maintaining medical and scientific usefulness. The

information will be used to maintain customer satisfaction with these products. There is no cost to respondents.

Respondents	Number of respondents	Responses/ respondent	Average burden/re-sponse (in hours)	Total burden (in hours)
Community member reviewing public health assessments	130	1	15/60	32.5
Environmental regulatory official requesting health consultations	210	1	15/60	52.5
Community member requesting health consultations	50	1	15/60	12.5
Community member reviewing public health fact sheets	750	1	15/60	187.5
Total	285

Dated: November 27, 2002.

Nancy E. Cheal,

Acting Associate Director for Policy, Planning and Evaluation, Centers for Disease Control and Prevention.

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare and Medicaid Services

[Document Identifier: CMS-10078]

Emergency Clearance: Public Information Collection Requirements Submitted to the Office of Management and Budget (OMB)

AGENCY: Centers for Medicare and Medicaid Services, HHS.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Centers for Medicare and Medicaid Services (CMS) (formerly known as the Health Care Financing Administration (HCFA)), Department of Health and Human Services, is publishing the following summary of proposed collections for public comment. Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

We are, however, requesting an emergency review of the information

collection referenced below. In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, we have submitted to the Office of Management and Budget (OMB) the following requirements for emergency review. We are requesting an emergency review because the collection of this information is needed before the expiration of the normal time limits under OMB's regulations at 5 CFR part 1320. This is necessary to ensure compliance with the Trade Act of 2002. We cannot reasonably comply with the normal clearance procedures because of an unanticipated event and public harm.

President Bush signed into law on August 6, 2002, the Trade Act of 2002. Additionally, the law provided funding of \$20 million in Fiscal Year (FY) 2003 for seed grants to states to create high risk insurance pools and \$80 million (\$40 million in FY 2003 and \$40 million in FY 2004) for matching grants to states for the operation of existing high risk pools. The provision in the legislation about high risk pools was unanticipated. (High risk pools are a mechanism for states to provide health coverage to individuals who cannot obtain health insurance in the private market because of a history of illnesses.)

In addition, public harm will result if funding to the states is delayed in any manner. The purpose of the grant program is to provide money to the states to expand the coverage in the high risk pools to make it available to more individuals. Any delay in the funding, therefore, would result in a delay in individuals obtaining health care for their illnesses. Because of this, the Bush Administration has instructed that this program to be enacted as quickly as possible.

CMS is requesting OMB review and approval of this collection by January 3, 2003, with a 180-day approval period. Written comments and

recommendations will be accepted from the public if received by the individuals designated below by January 2, 2003. During this 180-day period, we will publish a separate **Federal Register** notice announcing the initiation of an extensive 60-day agency review and public comment period on these requirements. We will submit the requirements for OMB review and an extension of this emergency approval.

Type of Information Collection Request: New collection; *Title of Information Collection:* Matching Grants to States for the Operation of High Risk Pools; *Form No.:* CMS-10078 (OMB# 0938-XXXX); *Use:* HHS/CMS is requiring this information as a condition of eligibility for grants that were authorized in the Trade Act of 2002 (Pub. L. 107-210). The information is necessary to determine if a state applicant meets the necessary eligibility criteria for a grant as required by the law. The respondents will be states that have a high risk pool as defined in section 2744(c)(2) of the Public Health Service Act. The grants will provide matching funds to states that incur losses in the operation of high risk pools. High risk pools are set up by states to provide health insurance to individuals that cannot obtain health insurance in the private market because of a history of illness; *Frequency:* On occasion; *Affected Public:* State, local, or tribal government; *Number of Respondents:* 20; *Total Annual Responses:* 20; *Total Annual Hours:* 800.

We have submitted a copy of this notice to OMB for its review of these information collections. A notice will be published in the **Federal Register** when approval is obtained.

To obtain copies of the supporting statement and any related forms for the proposed paperwork collections referenced above, access CMS' Web Site address at <http://cms.hhs.gov/regulations/pr/default.asp> or E-mail
