BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

44 CFR Part 67

[Docket No. FEMA-D-7612]

Proposed Flood Elevation Determinations

AGENCY: Federal Emergency
Management Agency (FEMA),
Emergency Preparedness and Response

Directorate, Department of Homeland
Security.

ACTION: Proposed rule.

SUMMARY: Technical information or
comments are requested on the
proposed Base (1% annual chance)
Flood Elevations (BFEs) and proposed
BFE modifications for the communities
listed below. The BFEs are the basis for
the floodplain management measures
that the community is required either to
adopt or to show evidence of being
already in effect in order to qualify or
remain qualified for participation in the
National Flood Insurance Program
(NFIP).

DATES: The comment period is ninety
(90) days following the second
publication of this proposed rule in a
newspaper of local circulation in each
community.

ADDRESSES: The proposed BFEs for each
community are available for inspection
at the office of the Chief Executive

Officer of each community. The
respective addresses are listed in the
table below.

FOR FURTHER INFORMATION CONTACT:

Doug Bellomo, P.E., Hazard
Identification Section, Emergency
Preparedness and Response Directorate,
FEMA, 500 C Street, SW., Washington,
DC 20472, (202) 646-2903.

SUPPLEMENTARY INFORMATION: FEMA
proposes to make determinations of
BFEs and modified BFEs for each
community listed below, in accordance
with section 110 of the Flood Disaster
Protection Act of 1973, 42 U.S.C. 4104,
and 44 CFR 67.4(a).

These proposed base flood and
modified BFEs, together with the
floodplain management criteria required
by 44 CFR 60.3, are the minimum that
are required. They should not be
construed to mean that the community
must change any existing ordinances
that are more stringent in their
floodplain management requirements.

The community may at any time enact stricter requirements of its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations are used to meet the floodplain management requirements of the NFIP and are also used to calculate the appropriate flood insurance premium rates for new buildings built after these elevations are made final, and for the contents in these buildings.

National Environmental Policy Act. This proposed rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Consideration. No environmental impact assessment has been prepared.

Regulatory Flexibility Act. The Mitigation Division Director of the Emergency Preparedness and Response Directorate certifies that this proposed

rule is exempt from the requirements of the Regulatory Flexibility Act because proposed or modified BFEs are required by the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are required to establish and maintain community eligibility in the NFIP. As a result, a regulatory flexibility analysis has not been prepared.

Regulatory Classification. This proposed rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

Executive Order 12612, Federalism. This proposed rule involves no policies that have federalism implications under Executive Order 12612, Federalism, dated October 26, 1987.

Executive Order 12778, Civil Justice Reform. This proposed rule meets the

applicable standards of section 2(b)(2) of Executive Order 12778.
