Abstract: The NESHAP apply to wet-formed fiberglass mat production facilities that emit greater than or equal to 10 tons per year (tpy) of any one hazardous air pollutant (HAP) or greater than or equal to 25 tpy of any combination of HAP. Affected sources include new and existing drying and curing ovens. New facilities include those that commenced construction or reconstruction after the original date of proposal (May 26, 2000). The NESHAP standards require initial notifications, performance tests, and semiannual reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all sources subject to NESHAP standards.

Form Numbers: None.

Respondents/affected entities: New and existing drying and curing ovens at wet-formed fiberglass mat production facilities.

Respondent's obligation to respond: Mandatory (40 CFR 63 Subpart HHHH).

Estimated number of respondents: 7 (total).

Frequency of response: Initial, semiannual.

Total estimated burden: 1,470 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$95,500 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: The adjustment decrease in burden from the most recently approved ICR is due to a decrease in the number of sources from 14 to 7, based on the Agency's evaluation of the source category as part of the residual risk and technology review (RTR). Additionally, the amendments to the NESHAP for Wet-Formed Fiberglass Mat Production (40 CFR, Part 63, Subpart HHHH) addressed in this ICR (1) adjust references to the Part 63 General Provisions (40 CFR, Part 63, Subpart A) and revise provisions in the NESHAP (40 CFR part 63, Subpart HHHH) to remove the SSM exemption and SSM plan and periodic report requirements; (2) require electronic submittal of performance test results; (3) reduce the frequency of compliance reports from a quarterly basis to a semiannual basis when there are deviations from applicable standards; and (4) reduce the parameter monitoring

and recording requirements during use of binder containing no HAP.

Director, Regulatory Support Division.
