

Kingman Reef and Palmyra Atoll

Kingman Reef and Palmyra Atoll have relatively undisturbed coral reefs, with high levels of coral diversity, fish biomass, and large proportions of apex predators relative to other areas in the central Pacific Ocean.

Johnston Atoll

Johnston Atoll's coral reefs help connect the Hawaiian Archipelago reef communities to others in the Pacific. This reef community is the originating source for much of the larvae for the Hawaiian Islands' corals, invertebrates, and other reef fauna. The atoll's reefs have the deepest reef-building corals on record.

Wake Atoll

Wake Atoll encompasses possibly the oldest living coral atoll in the world and has healthy and abundant coral and fish populations. CCPs have not been completed for Palmyra, Kingman, Wake, and Johnston Atoll NWRs. For the current MMP planning process, USFWS will focus on appropriate conservation and management recommendations for all refuges. Following the completion of the MMP, USFWS will prepare new CCPs and revise existing CCPs, as appropriate.

Monument Management Plan Development Process

The purpose for developing an MMP is to provide monument managers with a 15-year direction for the proper care and management of the significant objects of scientific interest that are within the boundaries of the Monument. The MMP will be consistent with Refuge purposes and will contribute toward the mission of the NWRs. The MMP will be consistent with the Magnuson-Stevens Act and sound principles of marine protected area planning and fish and wildlife management, conservation, legal mandates, and applicable policies. The EA will evaluate the impacts of implementing the proposed draft management plan, in accordance with the National Environmental Policy Act (42 U.S.C. 4321, as amended).

Public Involvement

NOAA and USFWS will conduct the planning process in a manner that will provide participation opportunities for the public and Federal, Tribal, State, and local governments. At this time, NOAA and USFWS encourage comments in the form of issues, concerns, ideas, and suggestions for the future management of the Monument.

Preliminary Issues, Concerns, and Opportunities

Below, we have identified the following preliminary issues, concerns, and opportunities that may be addressed in the MMP. Additional issues may be identified during public scoping.

- Climate impacts and management approach
- Invasive species prevention and control
- Management access, maintenance, and island infrastructure
- Seabird protection and management
- Scientific exploration and research opportunities
- Marine debris and abandoned floating fishing aggregation device removal

Next Steps

USFWS and NOAA will consider all the public comments received from this NOI in developing the draft MMP. The draft MMP and EA will be made available for public comment once they are completed.

To help accomplish this objective, fellowships are awarded through U.S. institutions of higher education to American doctoral dissertation fellows enabling them to conduct overseas research and enhance their foreign language proficiency. Under the Fulbright-Hays Doctoral Dissertation Research Abroad (DDRA) program, individual scholars apply through eligible institutions for an institutional grant to support the research fellowship. These institutions administer the program in cooperation with the U.S. Department of Education (US/ED). This information collection is the tool that can gather the information necessary to determine the performance of the fellows and the program. Since this collection is currently in a discontinued status, this collection package is a reinstatement with change.
