

reporting for its discretionary programs, ultimately working towards a single comprehensive reporting approach.

The Secretary's statutory and regulatory authority to administer housing and urban development programs include provisions allowing for the requirement of performance reporting from funding recipients. This legal authority is codified at 42 U.S.C. 3535(r). The individual privacy of service recipients is of the highest priority. The reporting repository established at HUD to receive data submission from funding recipients will not include any personally identifiable information (PII). Additionally, if the data from a funding recipient has 25 or fewer individuals served during a fiscal year as reported in the record-level reports, then the results for the demographic data elements for the 25 or fewer individuals will also be redacted or removed from the public-use data file and any publicly available analytical products in order to ensure the inability to identify any individual.

Eligible entities receiving funding by HUD are expected to implement the proposed recordkeeping and reporting requirements with available HUD funds. It is important to note that affected HUD funding recipients only submit a subset

of the universe of data elements presented. The participating HUD program offices determine the specific data collection and reporting requirements, which considers the type and level of service provided by the respective HUD program.

The reporting requirements in this proposal better organize the data than participating programs collected in the past, standardize outcomes and performance measures, and allow program offices at HUD to select which data elements are relevant for their respective programs. Documents detailing the data elements are available for review by request from Colette Pollard (Colette.Pollard@hud.gov). All information reported to HUD will be submitted electronically. Funding recipients may use existing management information systems provided those systems collect all the required data elements and can be exported for submission to HUD. Funding recipients that sub-award funds to other organizations will need to collect the required information from their sub-recipients.

Information collected and reported will be used by funding recipients and HUD for the following purposes:

- To provide program and performance information to recipients, general public, Congress, and other stakeholders;
- To continuously improve the quality, effectiveness, and efficiency of discretionary-funded programs;
- To provide management information for use by HUD in program administration and oversight, including the scoring of applications and the monitoring of funding-recipient participation, services, and outcomes; and
- To better measure and analyze performance information to identify successful practices to be replicated and prevent or correct problematic practices and improve outcomes in compliance with the Government Performance and Results Act (GPRA) and the GPRA Modernization Act.

The data collection and reporting requirements may expand to other HUD programs. Program implementation will be determined by the program. HUD will provide technical assistance to funding recipients throughout the implementation.

SUMMARY: We, the U.S. Fish and Wildlife Service, invite the public to comment on the following applications for a permit to conduct activities intended to recover and enhance endangered species survival. SUPPLEMENTARY INFORMATION:

Background

With some exceptions, the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), prohibits activities that constitute take of listed species unless a Federal permit is issued that allows such activity. The ESA's definition of "take" includes hunting, shooting, harming, wounding, or killing, and also such activities as pursuing, harassing, trapping, capturing, or collecting.

The ESA and our implementing regulations in the Code of Federal

Regulations (CFR) at title 50, part 17, provide for issuing such permits and require that we invite public comment before issuing permits for activities involving listed species.

A recovery permit we issue under the ESA, section 10(a)(1)(A), authorizes the permittee to conduct activities with endangered or threatened species for scientific purposes that promote recovery or enhance the species' propagation or survival. These activities often include such prohibited actions as capture and collection. Our regulations implementing section 10(a)(1)(A) for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

We invite local, State, Tribal, and Federal agencies and the public to submit written data, views, or arguments with respect to these applications. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies.
