NUCLEAR REGULATORY COMMISSION

[Docket 70-7005]

Waste Control Specialists, LLC; Issuance of Environmental Assessment and Finding of No Significant Impact for Exemption From Certain NRC Licensing Requirements for Special Nuclear Material for Waste Control Specialists, LLC

The U.S. Nuclear Regulatory Commission (NRC or the Commission) is considering issuance of an Order pursuant to section 274f of the Atomic Energy Act that would exempt Waste Control Specialists LLC (WCS) from certain NRC regulations. The exemption would allow WCS, under specified conditions, to possess waste containing special nuclear material (SNM), in greater quantities than specified in 10 CFR part 150, at WCS's facility located in Andrews County, Texas, without obtaining an NRC license pursuant to 10 CFR part 70. A description of the operations at the facility and staff's safety analysis for the exemption are discussed in the companion Safety Evaluation Report (SER).

Environmental Assessment (EA)

Identification of Proposed Action: Staff proposes to exempt WCS from the licensing requirements in 10 CFR part 70. The exemption would permit WCS to possess SNM without regard for mass. Rather than relying on mass to ensure criticality safety, concentration-based limits are being applied, such that accumulations of SNM at or below these concentration limits would not pose a criticality safety concern. The methodology used to establish these limits is discussed in the SER. The exemption is contingent on WCS complying with specific conditions in the exemption. These conditions are as follows:

1. Concentrations of SNM in individual waste containers and/or during processing must not exceed the following values:
