The purpose of this document is to extend the comment period an additional 30 days until March 28, 2012. SUPPLEMENTARY INFORMATION:

Background: In a separate notice of data availability, EPA provided an opportunity to comment on EPA's analyses of palm oil used as a feedstock to produce biodiesel and renewable diesel under the Renewable Fuel Standard (RFS) program. EPA's analysis of palm oil-based biofuels is a supplement to the final rule published on March 26, 2010, which made changes to the RFS program (75 FR 14670). EPA's analysis of the two types of biofuel shows that biodiesel and renewable diesel produced from palm oil have estimated lifecycle greenhouse gas (GHG) emission reductions of 17% and 11%, respectively, for these biofuels compared to the statutory baseline petroleum-based diesel fuel used in the RFS program. This analysis indicates that both palm-oil-based biofuels would not qualify as meeting the minimum

20% GHG performance threshold for renewable fuel under the RFS program.

Extension of Comment Period: EPA received requests for an extension of the palm oil NODA comment period from various parties. After considering all of these comments, EPA has determined that an extension of the comment period would provide the public adequate time to provide meaningful comment on the NODA. However, this need must be balanced against our desire to finalize our analysis in a timely manner. EPA believes that an additional 30 days is an appropriate amount of time to balance these needs. Accordingly, the public comment period for the palm oil NODA is extended until March 28, 2012. EPA does not anticipate any further extension of the comment period at this time.

Dated: February 7, 2012.

Margo Tsirigotis Oge,
Director, Office of Transportation and Air Quality.
