Muntasir Ali, Sector Policies and Program Division (D243-05), Office of Air Quality Planning and Standards, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (919) 541-0833; email address: ali.muntasir@epa.gov.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through February 28, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on August 6, 2024, during a 60-day comment period (89 FR 63933). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Ferroalloys Production Area Sources (40 CFR part 63, subpart YYYYYY) were proposed on September 15, 2008 (73 FR 53163), and promulgated on December 23, 2008 (73 FR 78637). These regulations apply to existing and new ferroalloy production facilities that are an area source of hazardous air pollutant (HAP) emissions. A ferroalloys production facility manufactures silicon metal, ferrosilicon, ferrotitanium using the

aluminum reduction process, ferrovanadium, ferromolybdenum, calcium silicon, silicomanganese zirconium, ferrochrome silicon, silvery iron, high-carbon ferrochrome, charge chrome, standard ferromanganese, ferromanganese silicon, calcium carbide or other ferroalloy products using electrometallurgical operations, including electric arc furnaces (EAFs) or other reaction vessels. New facilities include those that commenced either construction or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart YYYYYY. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities:

Ferroalloys production area sources.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart YYYYYY).

Estimated number of respondents: 9 (total).

Frequency of response: Initially, annually, and semiannually.

Total estimated burden: 362 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$49,600 (per year). There are no annualized capital or operation & maintenance costs.

Changes in the estimates: There is no change in burden from the most recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Second, the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. Since there are no changes in the regulatory requirements and there is no significant industry growth, there are also no changes in the capital/startup or operation and maintenance (O&M) costs.

Courtney Kerwin,

Director, Information Engagement Division.

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; NESHAP for Clay Ceramics Manufacturing (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NESHAP for Clay Ceramics Manufacturing (EPA ICR Number 2510.03, OMB Control Number 2030-0048) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through February 28, 2025. Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

DATES: Comments may be submitted on or before March 31, 2025.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OAR-2023-0136, to EPA online using www.regulations.gov (our preferred method), by email to a-and-r-docket@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

Submit written comments and recommendations to OMB for the proposed information collection within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through February 28, 2025. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on May 18, 2023 during a 60-day comment period (88 FR 31748). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP), for the regulations published at 40 CFR part 63, subpart KKKK were promulgated on October 26, 2015, amended on November 1, 2019, and minor technical corrections were made on November 19, 2021. These regulations apply to existing facilities and new facilities that manufacture pressed floor tile, pressed wall tile, or sanitaryware. New facilities include those that commenced construction or reconstruction on or after December 28, 2015. This information is being collected to assure compliance with 40 CFR part 63, subpart KKKKK.

Form numbers: None.

Respondents/affected entities: Clay ceramics manufacturing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart KKKKK).

Estimated number of respondents: 3 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 2,650 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$458,000 (per year), which includes \$124,000 annualized capital or operation & maintenance costs.

Changes in the estimates: There is a decrease of 18,313 hours in the total estimated respondent burden compared

with the ICR currently approved by OMB. This decrease is due to total estimated burden currently identified is the estimated average hours per year for years one through three of the ICR for the National Emission Standards for Hazardous Air Pollutants for Brick and Structural Clay Products Manufacturing (40 CFR part 63, subpart JJJJJ). The total estimated burden for this ICR extension is expected to be similar to the ongoing costs. Additionally, calculation adjustments appear in Table 1, where the recordkeeping requirements were omitted or miscalculated, namely, "Familiarize with regulatory requirements" had no hours allocated in the previous burden table. In addition, Repeat Performance test calculations and alternative fuel use estimates have calculation adjustments in order to distribute those costs evenly over the 3-year renewal period. There is an adjustment to the Capital/Startup vs. Operation and Maintenance (O&M) Costs table, now that the initial compliance and testing costs have passed and ongoing costs will be O&M only.

Courtney Kerwin,

Director, Information Engagement Division.
