

Appearance of Fabrics After Repeated Home Laundering. AATCC 124–2006 requires the use of an automatic washer (Table III) and tumble dryer (Table IV) that meet certain conditions. Staff is aware of the limited availability of automatic washing machines, and possibly dryers, capable of meeting the conditions in AATCC 124–2006. Please provide any comments on the testing burden or cost of performing the laundering procedure with the automatic washing machine and tumble dryer specified in the standard. Please provide details, and potential alternatives, when possible.

3. Test Result Codes

The standard lists reporting codes in 16 CFR 1610.8(b)(2) to describe the burning behavior of raised surface fabrics. The reporting codes, which are based on test results, indicate the proper classification for the textile. CPSC staff has received input that these codes may be confusing. Please provide any comments on the use or needed clarification of these codes.

4. Additional Burdens Associated With 16 CFR Part 1610

Please provide other input and recommendations about opportunities to reduce the cost of testing requirements or other costs and burdens associated with 16 CFR part 1610. Also please identify test procedures that may need clarifications, and provide recommendations or alternatives that may reduce the burdens associated with these regulations, as well as details about the costs of those alternatives.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

Air Plan Approval; SC; 2010 1-Hour SO₂ NAAQS Transport Infrastructure

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve

South Carolina’s June 25, 2018, State Implementation Plan (SIP) submission pertaining to the “good neighbor” provision of the Clean Air Act (CAA or Act) for the 2010 1-hour sulfur dioxide (SO₂) National Ambient Air Quality Standard (NAAQS). The good neighbor provision requires each state’s implementation plan to address the interstate transport of air pollution in amounts that contribute significantly to nonattainment, or interfere with maintenance, of a NAAQS in any other state. In this action, EPA is proposing to determine that South Carolina’s SIP contains adequate provisions to prohibit emissions within the State from contributing significantly to nonattainment or interfering with maintenance of the 2010 1-hour SO₂ NAAQS in any other state.
