Patent and Trademark Office

[Docket No. PTO–P–2021–0052]

Grant of Interim Extension of the Term of U.S. Patent No. 7,199,162; GRAFAPEX™ (Treosulfan)

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Notice of interim patent term extension.

SUMMARY: The United States Patent and Trademark Office has issued an order granting a one-year interim extension of the term of U.S. Patent No. 7,199,162 (‘162 patent).

FOR FURTHER INFORMATION CONTACT: Raul Tamayo, Senior Legal Advisor, Office of Patent Legal Administration, at 571–272–7728 or raul.tamayo@uspto.gov.

SUPPLEMENTARY INFORMATION: 35 U.S.C. 156 generally provides that the term of a patent may be extended for a period of up to five years, if the patent claims a product, or a method of making or using a product, that has been subject to certain defined regulatory review. 35 U.S.C. 156(d)(5) generally provides that the term of such a patent may be extended for no more than five interim periods of up to one year each, if the approval phase of the regulatory review period (RRP) is reasonably expected to extend beyond the expiration date of the patent.

On August 28, 2023, Medac Gesellschaft fuer Klinische Spezialparate mbH, the owner of record of the ‘162 patent, timely filed an application under 35 U.S.C. 156(d)(5) for a third interim extension of the term of the ‘162 patent. The ‘162 patent claims a method of using the human drug product known by the tradename GRAFAPEX™ (treosulfan). The application for interim patent term extension indicates that a RRP as described in 35 U.S.C. 156(g)(1)(B)(ii) began for GRAFAPEX™ (treosulfan) and is ongoing before the Food and Drug Administration for permission to market and use the product commercially.

Review of the interim patent term extension application indicated that, except for permission to market or use the product commercially, the ‘162 patent would be eligible for an extension of the patent term under 35 U.S.C. 156. Because it was apparent that the RRP would continue beyond the twice-extended expiration date of the ‘162 patent, *i.e.*, October 12, 2023, a third interim extension of the patent term under 35 U.S.C. 156(d)(5) was appropriate.
