

Affected Public: Motorists in passenger vehicles with children under 13 willing to participate at gas stations, fast food restaurants, day care centers, and recreation centers frequented by children during the time in which the survey is conducted.

Estimated Number of Respondents: Based on the average number of respondents from the last three survey years (2017, 2019, 2021), we expect to have approximately 5,300 adult motorists in passenger vehicles with children under 13 at gas stations, fast food restaurants, day care centers, and recreation as respondents.

Frequency: Biennial.

Estimated Total Annual Burden Hours: NHTSA estimates that the data collection will, on average, take approximately 4.25 minutes of each respondent's time. Respondents are adult motorists supplying information about children in their vehicle. Multiplying the 4.25 minutes of burden per respondent by the estimated 5,300 respondents yields 376 (5,300 × 4.25/60) total burden hours for all respondents collectively. Since NSUBS data are collected biennially, dividing the 376 total burden hours by two yields an annual burden of 188 hours.

To represent the value of the respondents' time, NHTSA uses the average hourly wage for the United States, which is estimated to be \$27.07.¹ Using this estimate, NHTSA estimates the total opportunity costs to respondents to be \$10,178.32 (376 × \$27.07) or \$5,089.16 annually.

Estimated Total Annual Burden Cost: \$0.

NHTSA estimates that there are no costs to respondents other than opportunity costs associated with the burden hours.
