### Animal Plant and Health Inspection Service

*Title:* 7 CFR 340; Introduction of Organisms and Products Altered or Produced Through Genetic Engineering.

*OMB Control Number:* 0579-0085.

*Summary of Collection:* The Animal and Plant Health Inspection Service (APHIS) is charged with preventing the introduction of plant pest into the United States or their dissemination within the United States. The statutory requirements for the information collection activity are found in the Plant Pest Act (PPA). The regulations in 7 CFR Part 340 implement the provisions of the PPA by providing the information necessary to establish conditions for proposed introductions of certain genetically engineered organisms and products which present a risk of plant pest introduction. APHIS will collect information using several APHIS forms.

*Need and Use of the Information:* APHIS will collect the information through a notification procedure or a permit requirement to ensure that certain genetically engineered organisms, when imported, moved interstate, or released into the environment, will not present a risk of plant pest introduction. The information collected through the petition process is used to determine whether a genetically engineered organism will pose a risk to agriculture or the environment if grown in the absence of regulations by APHIS. The information is also provided to State departments of agriculture for review, and made available to the public and private sectors on the Internet to ensure that all sectors are kept informed concerning any potential risks posed through the use of genetic engineering technology.

*Description of Respondents:* Business or other for profit; Not-for-profit institutions; State, Local or Tribal Government.

*Number of Respondents:* 121.

*Frequency of Responses:* Recordkeeping; Reporting: On occasion.
