

The PFRR is the only high-latitude, auroral-zone rocket launching facility in the United States where a sounding rocket can readily study the aurora borealis and the sun–earth connection.

Related Environmental Documents

In 2010, concerns raised by agencies and organizations regarding the potential impact of its operations at PFRR prompted NASA to review its 2000 SRP Final Supplemental Environmental Impact Statement (FSEIS). In doing so, NASA determined that while the overall environmental analysis in the 2000 SRP FSEIS remains sufficient to support the Agency's broad decision to continue the SRP at PFRR, potential changes in both operations and the environmental context of the launch corridor north of the site warranted preparation of additional site-specific environmental analysis. Accordingly, the FEIS tiers from the programmatic 2000 FSEIS and provides a focused analysis of SRP operations at PFRR.

Alternatives

The FEIS evaluates the environmental consequences of five alternative means for continuing sounding rocket launches at PFRR. The alternatives differ primarily in the level of effort that would be exerted to locate and recover past and future launch related items in downrange lands. Two alternatives also include a restriction on planning rocket motor or payload impacts within designated Wild or Scenic Rivers. NASA has identified Alternative 1, *Continue NASA SRP Activities and Flights at PFRR within Existing Flight Zones with Environmental Screening for Recovery of New and Existing Stages and Payloads (Environmentally Responsible Search and Recovery Alternative)* as its Preferred Alternative.

Cooperating Agency Actions

The FEIS will serve as a decision-making tool not only for NASA but also for its two Federal Cooperating Agencies, BLM and USFWS. Directly north of the PFRR launch site are its downrange flight zones, over which rockets are launched and within which spent stages and payloads impact the ground. Within these flight zones are BLM's Steese National Conservation Area and White Mountain National Recreational Area, and the USFWS-managed Arctic and Yukon Flats National Wildlife Refuges. Historically, the managing entities have issued UAF annual or multi-year special-use authorizations for impact of rockets and recovery operations on these lands.

BLM and USFWS are currently considering if and how future authorizations for rocket impact and recovery would be issued for the lands under their management. As such, the FEIS considers the effects of each agency's respective action—both issuance and non-issuance of future authorizations.

Review of Draft EIS

NASA mailed over 150 copies of the Draft EIS (DEIS) to potentially interested Federal, State, and local agencies; tribal governments; organizations; individuals; and public reading rooms. Following the U.S. EPA's publication of a Notice of Availability (NOA) of the DEIS in the **Federal Register** on September 28, 2012 (77 FR 59611), NASA published its own NOA of the DEIS on October 10, 2012 (77 FR 61642). In addition, NASA held public meetings in Anchorage and Fairbanks, Alaska, and made the DEIS publicly available in electronic format on the project Web site. The public review and comment period for the DEIS closed on November 28, 2012. NASA received a total of 6 submissions (letters, emails, and transcribed oral comments) from Federal agencies, non-governmental organizations, and individuals. The resulting 40 comments received spanned a broad range of topics; however the majority of commenters expressed concern regarding effects of the SRP on special use lands (e.g., designated Wilderness and Wild Rivers) and wilderness-based recreation. Both the comments received on the DEIS and NASA's responses to those comments are included in the FEIS in Appendix K. In parallel with preparing the FEIS, NASA also formally consulted with resource agencies regarding the potential effects of its operations on federally threatened and endangered species and cultural and historic resources. The outcomes of these consultations are summarized in the FEIS and are also included in Appendix A.

In summary, notice of the availability of the FEIS is hereby given.

Assistant Administrator, Office of Strategic Infrastructure.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–2013–032]

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. They authorize the preservation of records of continuing value in the National Archives of the United States and the destruction, after a specified period, of records lacking administrative, legal, research, or other value. Notice is published for records schedules in which agencies propose to destroy records not previously authorized for disposal or reduce the retention period of records already authorized for disposal. NARA invites public comments on such records schedules, as required by 44 U.S.C. 3303a(a).

DATES: Requests for copies must be received in writing on or before August 2, 2013. Once the appraisal of the records is completed, NARA will send a copy of the schedule. NARA staff usually prepare appraisal memorandums that contain additional information concerning the records covered by a proposed schedule. These, too, may be requested and will be provided once the appraisal is completed. Requesters will be given 30 days to submit comments.

ADDRESSES: You may request a copy of any records schedule identified in this notice by contacting Records Management Services (ACNR) using one of the following means:

Mail: NARA (ACNR), 8601 Adelphi Road, College Park, MD 20740–6001

Email: request.schedule@nara.gov.

FAX: 301–837–3698.

Requesters must cite the control number, which appears in parentheses after the name of the agency which submitted the schedule, and must provide a mailing address. Those who desire appraisal reports should so indicate in their request.

FOR FURTHER INFORMATION CONTACT: Margaret Hawkins, Director, Records

Management Services (ACNR), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740–6001. Telephone: 301–837–1799. Email: request.schedule@nara.gov.

SUPPLEMENTARY INFORMATION: Each year Federal agencies create billions of records on paper, film, magnetic tape, and other media. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval, using the Standard Form (SF) 115, Request for Records Disposition Authority. These schedules provide for the timely transfer into the National Archives of historically valuable records and authorize the disposal of all other records after the agency no longer needs them to conduct its business. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

The schedules listed in this notice are media neutral unless specified otherwise. An item in a schedule is media neutral when the disposition instructions may be applied to records regardless of the medium in which the records are created and maintained. Items included in schedules submitted to NARA on or after December 17, 2007, are media neutral unless the item is limited to a specific medium. (See 36 CFR 1225.12(e).)

No Federal records are authorized for destruction without the approval of the Archivist of the United States. This approval is granted only after a thorough consideration of their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and whether or not they have historical or other value.

Besides identifying the Federal agencies and any subdivisions requesting disposition authority, this public notice lists the organizational unit(s) accumulating the records or indicates agency-wide applicability in the case of schedules that cover records that may be accumulated throughout an agency. This notice provides the control number assigned to each schedule, the total number of schedule items, and the number of temporary items (the records proposed for destruction). It also includes a brief description of the temporary records. The records

schedule itself contains a full description of the records at the file unit level as well as their disposition. If NARA staff has prepared an appraisal memorandum for the schedule, it too includes information about the records. Further information about the disposition process is available on request.
